In the Light of Evolution National Academy of Sciences, 2009-12-30 Two Centuries of Darwin is the outgrowth of an Arthur M Sackler Colloquium sponsored by the National Academy of Sciences on January 16 17 2009 In the chapters of this book leading evolutionary biologists and science historians reflect on and commemorate the Darwinian Revolution They canvass modern research approaches and current scientific thought on each of the three main categories of selection natural artificial and sexual that Darwin addressed during his career Although Darwin's legacy is associated primarily with the illumination of natural selection in *The Origin* he also contemplated and wrote extensively about what we now term artificial selection and sexual selection In a concluding section of this book several science historians comment on Darwin's seminal contributions

Two Centuries of Darwin is the third book of the *In the Light of Evolution* series Each installment in the series explores evolutionary perspectives on a particular biological topic that is scientifically intriguing but also has special relevance to contemporary societal issues or challenges The ILE series aims to interpret phenomena in various areas of biology through the lens of evolution and address some of the most intellectually engaging as well as pragmatically important societal issues of our times

The Handbook of Rationality Markus Knauff, Wolfgang Spohn, 2021-12-14 The first reference on rationality that integrates accounts from psychology and philosophy covering descriptive and normative theories from both disciplines Both analytic philosophy and cognitive psychology have made dramatic advances in understanding rationality but there has been little interaction between the disciplines This volume offers the first integrated overview of the state of the art in the psychology and philosophy of rationality Written by leading experts from both disciplines *The Handbook of Rationality* covers the main normative and descriptive theories of rationality how people ought to think how they actually think and why we often deviate from what we can call rational It also offers insights from other fields such as artificial intelligence economics the social sciences and cognitive neuroscience *The Handbook* proposes a novel classification system for researchers in human rationality and it creates new connections between rationality research in philosophy psychology and other disciplines Following the basic distinction between theoretical and practical rationality the book first considers the theoretical side including normative and descriptive theories of logical probabilistic causal and defeasible reasoning It then turns to the practical side discussing topics such as decision making bounded rationality game theory deontic and legal reasoning and the relation between rationality and morality Finally it covers topics that arise in both theoretical and practical rationality including visual and spatial thinking scientific rationality how children learn to reason rationally and the connection between intelligence and rationality

The Implications of Evolution for Metaphysics David H. Gordon, 2023-08-22 After the nineteenth century turn from idealism when idealist philosophies were largely abandoned for

materialist ones many analytic philosophers have adhered to scientific naturalism as the new orthodoxy largely due to the success of scientific advancements The New Atheists such as Daniel Dennett and Richard Dawkins claim it is Darwin who deserves much of the credit for repudiating the traditional Mind first world view In *The Implications of Evolution for Metaphysics Theism Idealism and Naturalism* David H Gordon explores questions such as Is it true that evolution is incompatible with theism and necessarily results in naturalism Is it possible as naturalism maintains that everything can be reduced to physical processes Or are there too many recalcitrant phenomena that defy reduction Can the epistemological conditions for metaphysical knowledge be met If the underdetermination of theory allows for multiple metaphysical theories to cover the same phenomena with each offering an epistemically adequate explanation then neither naturalism nor theism can be asserted to be objectively true Nevertheless it is possible to favor one over the other based on overall coherence and explanatory power

Epistemology Richard Feldman,2003 Sophisticated yet accessible and easy to read this introduction to contemporary philosophical questions about knowledge and rationality goes beyond the usual bland survey of the major current views to show that there is argument involved Throughout the author provides a fair and balanced blending of the standard positions on epistemology with his own carefully reasoned positions or stances into the analysis of each concept Epistemological Questions The Traditional Analysis of Knowledge Modifying the Traditional Analysis of Knowledge Evidentialist Theories of Justification Non evidentialist Theories of Knowledge and Justification Skepticism Epistemology and Science Relativism For anyone interested in the philosophy of knowledge and rationality [The Intellectual Virtues and the Life of the Mind](#) Jonathan L. Dennett,Alvin Plantinga,2011-05-05 An enlightening discussion that will motivate students to think critically the book opens with Plantinga s assertion that Christianity is compatible with evolutionary theory because Christians believe that God created the living world and it is entirely possible that God did so by using a process of evolution **Truth Trackers** Charles Mills,2001-06-01 **Philosophia Christi** ,2000 *Metaethics, Egoism, and Virtue* Allan Gotthelf,2011 Philosopher novelist Ayn Rand 1905 1982 is a cultural phenomenon Yet Rand s work has until recently received little serious attention from academics This new series seeks a fuller scholarly understanding of this highly original and influential thinker The chapters in this volume address the basis of her egoism in a virtue centered normative ethics her account of how moral norms in general are themselves based on a fundamental choice by an agent to value his own life and how her own approach to the foundations of ethics is to be compared and contrasted with familiar approaches in the analytic ethical tradition *Adventist Review* ,2007 [Naturalising Intentionality](#) Alexander Almér,2007
