Master of None Clifford Hudson, 2020-10-13 In this revelatory memoir, the former CEO of Sonic challenges established thinking, offering counterintuitive career advice essential for every professional at all levels, whether you're just starting out or in the middle of your career. In his bestselling *Outliers*, Malcolm Gladwell introduced readers to the 10,000-hour rule, the foundation of success in any endeavor. But as Clifford Hudson reveals, there are serious pitfalls to this rule. What happens to those who spend years trying to achieve something that doesn't quite pan out? Do you really have to grind down the same path for many years, sacrificing priorities to become successful? In *Master of None*, Hudson turns expertise on its head and shows that by embracing variety and becoming more versatile, anyone can succeed and become more open to different opportunities in life. To do so, he provides three basic rules that will see any professional through: Don't plan, explore. Don't specialize, generalize. Don't keep your head down, turn it up toward opportunity. In this thought-provoking memoir, Hudson asks whether or not mastery is even necessary to succeed. Most people don't need to be experts in their field. Yes, the successful know more than the average person about a particular topic, and they often possess a better-than-average ability with a particular skillset, but not everyone who is successful is an expert, he makes clear. More importantly, in today's technology-driven environment, change is the only constant, including the nature of work and the skills required to do it. Overinvesting in expertise is often riskier than learning to be adaptive and open to new knowledge, ideas, and skills. Experience can also lead to overconfidence. And yet, we continue to deeply value the expertise ideal. Groundbreaking and thought-provoking, *Master of None* is a new way forward to help businesses and professionals at all levels thrive.
