Unprecedented Realism:

Unprecedented Realism K. Michael Hays, Rodolfo Machado, Jorge Silvetti, 1995 For almost two decades the work of Rodolfo Machado and Jorge Silvetti has remained at the forefront of theoretical production Their rigorously detailed and exquisitely drawn projects characterize an attitude of aesthetic realism towards materials construction function and the cultural role of architecture Yet the conditions they address and the effects they produce are unprecedented Their projects synthesize seemingly incompatible images uses and typologies Unprecedented Realism is not an illustration of theory Rather what emerges is a constructive theory of architecture that understands the process of design itself as a distinct mode of knowledge as theoretical research that is still irreducibly architectural Unprecedented Realism presents both buildings and urban infrastructures Steps of Providence RI Entrance for Cranbrook Bloomfield Hills Mich Carnegie Mellon University Center Pittsburgh Pershing Square Los Angeles and Times Square New York City Along with the analytic text of K Michael Hays the volume includes critical essays by Alan Colquhoun George Baird Fars el Dahdah and Rodolphe el Khoury please see the Table of Contents *Reconstructing Architecture* Thomas A. Dutton, Lian Hurst Mann, 1996 *Reconstructing Architecture* was first published in 1996 Minnesota Archive Editions uses digital technology to make long unavailable books once again accessible and are published unaltered from the original University of Minnesota Press editions To create architecture is an inherently political act yet its nature as a social practice is often obscured beneath layers of wealth and privilege The contributors to this volume question architecture's complicity with the status quo moving beyond critique to outline the part architects are playing in building radical social movements and challenging dominant forms of power The making of architecture is instrumental in the construction of our identities our differences the world around us much of what we know of institutions the distribution of power social relations and cultural values is mediated by the built environment Historically architecture has constructed the environments that house the dominant culture Yet as the essays in *Reconstructing Architecture* demonstrate there exists a strong tradition of critical practice in the field one that attempts to alter existing social power relations Engaging the gap between modernism and postmodernism each chapter addresses an oppositional discourse that has developed within the field and then reconstructs it in terms of a new social project feminism social theory environmentalism cultural studies race and ethnic studies and critical theory The activists and scholars writing here provide a clarion call to architects and other producers of culture challenging them to renegotiate their political allegiances and to help reconstruct a viable democratic life in the face of inexorable forces driving economic growth destroying global ecology homogenizing culture and privatizing the public realm *Reconstructing Architecture* reformulates the role of architecture in society as well as its capacity to further a progressive social transformation Contributors Sherry Ahrentzen U of Wisconsin Milwaukee Bradford C Grant California Polytechnic State U San Luis Obispo Richard Ingersoll Rice U Margaret Soltan George Washington U Anthony Ward U of Auckland New Zealand Thomas A Dutton is an architect and professor of
