Women Willing to Fight Silke Andris, Ursula K. Frederick, 2009-01-23 *Women Willing to Fight* is a collection of essays that explores the presence of the fighting woman in contemporary Hollywood cinema Drawn from a variety of genres the authors examine the changing role image and position of this figure in film over recent decades The increasing dominance of this character and her repositioning as a protagonist reinvigorates discussion concerning the dynamics of film narrative and spectacle Each contribution takes as its focus a central character from the Hollywood blockbuster era examining in detail the motivations and implications of the fighting female In doing so the collection raises significant questions about the place of the fighting woman in contemporary media and the relationships she forges on and off screen With a strong appreciation of the mixed messages inherent in images of fighting women *Women Willing to Fight* seeks to draw attention to the embodied forms physical intellectual and emotional through which female fighters are represented The anthology places particular emphasis on the emergence of the physically empowered woman a character for whom the body has become a weapon and a target While early cinematic representations allowed women to voice their fury and frustration today s female fighters not only speak up but muscle up Putting aside the supernatural powers of many action heroines this volume focuses on the kinds of fighting skills abilities and desires that are engendered in characterisations of mortal women To this end the volume implicitly addresses complex and cross cultural notions of extra ordinary power By examining the embodied arsenal that these characters possess and develop through training conditioning and life experience it considers the representation of motivation and metamorphoses into the fighting woman how a woman fights holds implicit meaning and inevitably urges us to consider why and what she is fighting for
