Study Abroad and Second Language Use Valerie A. Pellegrino Aveni, 2005-03-10 Language plays an essential role in how we portray our personalities Through social interaction others develop a picture of us based on our linguistic cues However when we interact in a foreign language and in a new country limitations in linguistic and cultural knowledge can make self presentation a more difficult task This book explores the problems faced by language students embarking on study abroad programmes spending time in a foreign country and having to interact and express their personalities in a second language Drawing on her extensive work with students Valerie Pellegrino Aveni explores the factors that complicate self presentation and the strategies students use for overcoming these looking in particular at issues of anxiety control age gender risk taking and self esteem Offering rich insights into the study abroad experience this book will be an invaluable resource for professionals in second language acquisition and for teachers and students preparing for study abroad

Multiple Perspectives on the Self in SLA Sarah Mercer, Marion Williams, 2014-02-03 Instead of viewing different perspectives on the self as competing with each other and considering one perspective on the self as being inherently better than another this book takes the view that a fuller more comprehensive picture of the self in SLA can be gained by examining and combining insights from different perspectives This original collection of papers thus attempts to provide a thorough overview of the ways in which the self can be conceptualised in SLA contexts The editors have brought together a diverse range of theoretical perspectives on the self to allow the reader to appreciate the insights that each approach contributes to overall understandings of the self in the domain of second language acquisition and foreign language learning

The Routledge Handbook of Language Learning and Teaching Beyond the Classroom Hayo Reinders, Chun Lai, Pia Sundqvist, 2022-05-30 Informal language learning beyond the classroom plays an important and growing role in language learning and teaching This Handbook brings together the

existing body of research and unites the various disciplines that have explored this area in order to present the current state of knowledge in one accessible resource Much of adult learning takes place outside of formal education and for language learning it is likely that out of class experiences play an equally important role It is therefore surprising that the role of informal language learning has received little attention over the years with the vast majority of research instead focusing on the classroom Researchers from a range of backgrounds however have started to realise the important contribution of informal language learning both in its own right and in its relationship with classroom learning Studies in the areas of learner autonomy learning strategies study abroad language support learners voices computer mediated communication mobile assisted language learning digital gaming and many others all add to our understanding of the complex and intersecting ways in which learners construct their own language learning experiences drawing from a wide range of resources including materials teachers self study technology other learners and native speakers This Handbook provides a sound and comprehensive basis for researchers and graduate students to build upon in their own research of language learning and teaching beyond the classroom

[Towards an Understanding of Language Learner Self-Concept](#) Sarah Mercer,2011-01-04 This book contributes to our growing understanding of the nature and development of language learner self concept It assesses the relevant literature in the disciplines of psychology and applied linguistics and describes in depth qualitative research examining the self concepts of tertiary level EFL learners Although researchers in applied linguistics and SLA have

recognized the importance of self constructs there remains little empirical work in the context of foreign language learning that focuses exclusively and at length on this central psychological construct The content of this monograph draws on interdisciplinary sources with input from psychology and applied linguistics It will appeal to students and researchers interested in language learner psychology as well as self related constructs in general The text provides insights into how learners view themselves and how these self beliefs can develop and affect the progress of an individual s language learning

Interculturality in International Education Jane Jackson,2018-05-15 This comprehensive volume provides a state of the art overview of the key issues and developments in study abroad research and practice with a specific focus on the intercultural and language learning dimensions of the study abroad experience Rather than looking at individual studies the book seeks to capture the full complexity of the language learning and intercultural dynamics of study abroad by exploring a wide range of topics of particular interest to study abroad researchers and practitioners including the role of individual differences identity reconstruction and interculturality the challenges of assessing learning outcomes and recent pedagogical interventions designed to enhance and extend language learning and engagement in these contexts The volume also takes a step back to look at future directions for study abroad research and offers innovative interventions in study abroad programming that emphasise its intercultural elements This book is an authoritative resource for study abroad scholars and researchers in such fields as intercultural communication applied linguistics sociolinguistics and language education
