Academic Understanding** Noel Entwistle,2018-06-13 The research described in Student Learning and Academic  
Understanding had its origins in the pioneering work of Ausubel Bruner and McKeachie and followed two complementary  
lines of development The first line extended the ideas of Marton on approaches to learning through an inventory designed to  
assess these approaches among large samples of students and using in depth interviews with students about their  
experiences of academic understanding The second line drew on a range of studies to explore the influences of university  
teaching and the whole teaching learning environment on the quality of student learning Taking the research as a whole  
shows the value of complementary research approaches to describing student learning while the findings brought together in  
the final chapter suggest ways of supporting deep approaches and the development of personal academic understanding  
among students Student Learning and Academic Understanding covers a wide range of concepts that have emerged from  
interviews in which students use their own experiences to describe how they study and what they find most useful in  
developing an academic understanding of their own These concepts differ from the traditional psychological concepts by  
being focused on the specific contexts of university and college although they are also relevant to the later stages of school  
education Explains the origins meanings and relevance of deep and surface approaches to learning Introduces an array of  
concepts derived from the specific contexts of university education Illustrates how in depth interviewing can be used to  
explore students ways of thinking Provides a series of heuristic models to guide thinking about the influences on student
