## Studying Children:

**Studying Children in Context** M. Elizabeth Graue, Daniel J. Walsh, 1998-02-19 What is the world like for today's children? How do they construct meaning in it? Answering these key questions, *Studying Children in Context* explains the art and science of doing qualitative research involving children. Authors M. Elizabeth Graue and Daniel J. Walsh carefully discuss the research process, dealing succinctly with generic research issues yet emphasizing where work with children presents its own particular challenges. They look across the research enterprise in the first part of the book, conceptualizing it as a holistic activity. They next focus on fieldwork and in the final section examine the interpreting and reporting aspects of qualitative research. In addition to presenting their own considerable experiences in fieldwork with children, Graue and Walsh also present the contributions of numerous researchers with their own insights on key issues. *Studying Children in Context* will be an invaluable addition to the libraries of teachers and researchers interested in qualitative research methods in general and in doing fieldwork with children in particular.

**Ways of Studying Children** Millie Almy, Ruth Cunningham, 1968 *WAYS OF STUDYING CHILDREN*. MILLIE. ALMY, 1979

**Studying Children: A Cultural-Historical Approach** Hedegaard, Marianne, Fleer, Marilyn, 2008-12-01 This work discusses the complexity of child development. It provides a critique of alternative perspectives of research and development and shows how to do research with the concepts of cultural historical theory.

**The Children: how to Study Them** Francis Warner, 1887

Ways of Studying Children Millie Corinne Almy, Ruth Cunningham, 1966

Young Children Learning Barbara Tizard, Martin Hughes, 1984 his fascinating account of an unusual research project challenges many assumptions about how young children learn and how best to teach them. In particular, it turns upside down the commonly held belief that professionals know better than parents how to educate and bring up children and it throws doubt on the theory that working class children underachieve at school because of a language deficit at home.

Studying Children Theodore L. Torgerson, 1947 *Studying Children* has been designed to provide the teacher in training and the teacher in service with the understanding and the tools which will enable her to study her pupils. In an attempt to bridge the gap between theory and practice, the book provides functional material in child study, treating in detail such problems as:

- How important is it to study children?
- How do you study children?
- What do you need to know about children?
- What use can the teacher make of the information gathered?

She will be shown how child study can become an integral part of her teaching and she will be equipped to initiate and carry out such a program of studying the pupils in her school.
