The Racial Contract:

The Racial Contract Charles W. Mills, 2014-05-29 The Racial Contract puts classic Western social contract theory deadpan to extraordinary radical use With a sweeping look at the European expansionism and racism of the last five hundred years Charles W Mills demonstrates how this peculiar and unacknowledged contract has shaped a system of global European domination how it brings into existence whites and non whites full persons and sub persons how it influences white moral theory and moral psychology and how this system is imposed on non whites through ideological conditioning and violence The Racial Contract argues that the society we live in is a continuing white supremacist state Holding up a mirror to mainstream philosophy this provocative book explains the evolving outline of the racial contract from the time of the New World conquest and subsequent colonialism to the written slavery contract to the separate but equal system of segregation in the twentieth century United States According to Mills the contract has provided the theoretical architecture justifying an entire history of European atrocity against non whites from David Hume s and Immanuel Kant s claims that blacks had inferior cognitive power to the Holocaust to the kind of imperialism in Asia that was demonstrated by the Vietnam War Mills suggests that the ghettoization of philosophical work on race is no accident This work challenges the assumption that mainstream theory is itself raceless Just as feminist theory has revealed orthodox political philosophy s invisible white male bias Mills s explication of the racial contract exposes its racial underpinnings [The Racial Contract](#) Charles W. Mills's The Racial Contract* Everest Media, 2022-03-27T22:59:00Z Please note This is a companion version not the original book Sample Book Insights 1 The social contract is actually several

contracts in one The political contract is the foundation of government and our political obligations to it The moral contract is the foundation of the moral code established for the society by which the citizens are supposed to regulate their behavior 2 The Racial Contract is the set of agreements or meta agreements between the members of one subset of humans designated by racial criteria who agree to categorize the remaining subset of humans as nonwhite and of a different and inferior moral status 3 In the Racial Contract the state is used to partition and then transform human populations into white and nonwhite men The role of the state is to maintain and reproduce this racial order securing the privileges and advantages of full white citizens while maintaining the subordination of nonwhites 4 The racial contract represents a society's established morality as just a set of rules for expediting the rational pursuit and coordination of our own interests without conflict with those who are doing the same thing

Charles Mills' The Racial Contract Elvira Basevich, 2025-06-30 This book features emerging and established philosophers revisiting Charles Mills' *The Racial Contract* twenty five years after its publication Each contribution reassesses the singular book's bold critique of liberalism and social contract theory advancing and interrogating Mills's philosophical legacy Notably lines of inquiry include the ideal/nonideal distinction the merits of the social contract model for normative political inquiry and the epistemology of ignorance This book was originally published as a special issue of *Critical Review of International Social and Political Philosophy*

[The Legacy of Charles W. Mills and The Racial Contract in Educational Justice](#) Cheryl E. Matias, 2024-11-25 Race is everywhere and pretending not to see it only does more damage than good This book delves into the work of Charles Mills and how his underlying philosophies of race still play out in today's economic educational political and sociological arena Charles Mills left a legacy of philosophical racial analyses needed to better understand race racism whiteness and white supremacy worldwide From the *Racial Contract* to global issues of colonial whiteness and epistemological racial ignorance Mills' theories still resonate in the research that race scholars conduct today Needless to say despite his passing Charles' work lives on To honour Mills' scholarship this book draws on interdisciplinary studies e.g. sociology political science Black studies and education to excavate the racial landscape of the U.S. post-Trump Anti-CRT bans BLM and global racial reckonings Within this volume prominent scholars of race worldwide and from a variety of disciplines discuss Mills' theories as applied to contemporary discourses of race whilst also offering very personal vignettes that best illuminate who Charles was to us all Essentially the man behind the theories Filled with both deep theoretical analyses and personal stories of Charles this book will liven the spirits hearts and hope for racial justice and those who work endlessly towards it This book is a key resource for scholars researchers and practitioners in the fields of education sociology political science racial and ethnic studies development studies and philosophy It was originally published as a special issue of the journal *Race Ethnicity and Education*

The American Untouchables: America & the Racial Contract Andre Smith, 2019-02-15 The issue of race is often a scab Americans choose to ignore However social science has a responsibility and an obligation to examine not simply the amenable subjects but also the controversial This work in a word is

controversial Thomas Franks 2004 argued that cultural differences led white Kansans to abandon the Democratic Party for the Republican Party during the 1980s He specifically argued that abortion was the unifying issue in this ideological migration Simultaneously future President Ronald Reagan opened his campaign for the presidency in Philadelphia Mississippi the sight of the massacre of four young civil rights activists over a decade earlier Race has and is a factor in the American experience Franks premise is simply that the absence of the concentration of African Americans in the Kansas area negated the influence of the black threat hypothesis on the observed ideological switch of white Kansans This work argues that Franks premise fails to incorporate the over arching ideological switch of white voter migration to the Republican party that was occurring during the same period and that Reagan s speech in Philadelphia Mississippi was an overt cue that he was rejecting the civil rights consensus for an historically established race based social contract that positioned people of color outside the traditional bounds of the social contract The study is a sociopolitical analysis of the African American experience utilizing the racial contract framework developed by Charles Mills The racial contract holds that the social contract explicitly dictates interactions and transaction costs between citizens and government Mills supposition is that historically non Western Europeans were excluded from the penalties for violations of the social contract and a tacit race based contract dictated transaction costs and interactions between Europeans and non Europeans The work utilizes the framework to trace the sociopolitical environment from the first appearance of Africans in America to the present It has the supposition that the initial sociopolitical status of Africans in America was as a result of the reformation of the Western feudal agrarian culture with African captives attached to the land as the neo serfs but that the reformation of feudalism was only possible within the context that Africans were implicitly viewed as outside the bounds of the codified social contract It traces American sociopolitical conflict over the expansion of the racial contract which was the basis of the American Civil War and the establishment of an implicit sociopolitical order within the bounds of the racial contract at the end of the Civil War with codified sanctions for violations of commensality and endogamy

The Racial Contract Charles Wade

Mills,1997-09-11 Argues that racially structured discrimination is the norm by using social contract theory Rhetoric and "race Traitors" Olivia Nicole Gilbert,2019 This thesis examines political philosopher Charles Mills The Racial Contract 1997 within the context of the Afro modern tradition of political thought By reading The Racial Contract hereafter TRC as part of this tradition I draw attention to aspects of the text that have been overlooked in the scholarly literature namely the role of rhetoric in accomplishing the goals of the text Specifically TRC calls for white people to become race traitors meaning those who reject their racial privilege and actively work to dismantle systems of white supremacy I highlight the ways in which the

rhetoric of TRC works to incite a subjective transformation in white readers working on both cognitive and affective dimensions to re orient their relationship to the world and those around them The transformation of white readers hinges crucially on the epistemological insight of nonwhite people In addition to the larger context of Afro modern political thought I show how TRC draws on rhetorical strategies from three other genres within modern political thought manifestoes French structuralism and contract theory and orients them toward the questions of white supremacy and racial domination Ultimately I argue that the role of rhetoric in TRC affords a distinct approach to the problem of white supremacy in the contemporary moment a moment marked by forms of colorblind racism that often make white supremacy invisible to those who benefit from it most TRC shows how rhetoric plays a role in the political subjective and epistemological transformations required if white people are to make a contribution to achieving racial justice

The Contract and Domination Carole Pateman, Charles Mills, 2013-04-23 Contract and Domination offers a bold challenge to contemporary contract theory arguing that it should either be fundamentally rethought or abandoned altogether Since the publication of John Rawls s A Theory of Justice contract theory has once again become central to the Western political tradition But gender justice is neglected and racial justice almost completely ignored Carole Pateman and Charles Mills s earlier books The Sexual Contract 1988 and The Racial Contract 1997 offered devastating critiques of gender and racial domination and the contemporary contract tradition s silence on them Both books have become classics of revisionist radical democratic political theory Now Pateman and Mills are collaborating for the first time in an interdisciplinary volume drawing on their insights from political science and philosophy They are building on but going beyond their earlier work to bring the sexual and racial contracts together In Contract and Domination Pateman and Mills discuss their differences about contract theory and whether it has a useful future excavate the white settler contract that created new civil societies in North America and Australia argue via a non ideal contract for reparations to black Americans confront the evasions of contemporary contract theorists explore the intersections of gender and race and the global sexual racial contract and reply to their critics This iconoclastic book throws the gauntlet down to mainstream white male contract theory It is vital reading for anyone with an interest in political theory and political philosophy and the systems of male and racial domination
