Through A Time Sieve:

Don't Look Back John Gribbin, 2017-05-05 A real scientist writing science fiction with real science what more could one ask John Gribbin is a visionary and one heck of a good storyteller Robert J Sawyer Hugo Award winning author of QUANTUM NIGHT John Gribbin widely regarded as one of the best science writers of the 20th century has also unsurprisingly been writing science fiction for many years While his novels are well known his short stories are perhaps less so He has also written under pseudonyms Here for the first time is the definitive collection of John's short stories Many were originally published in Analog and other magazines Some were the seeds of subsequent novels As well as 23 Science Fiction short stories three of which John wrote with his son Ben this collection includes two Science fact essays on subjects beloved of science fiction authors and readers In one essay John provides scientifically accurate DIY instructions for creating a time machine and in the other he argues that the Moon is in fact a Babel Fish The stories many written at a time when issues such as climate change were taken less seriously now seem very relevant again in an age of dubious politicians What underpins all of them of course is a grounding in solid science But they are also laced with a dry and subtle wit which will not come as a surprise to anyone who has ever met John at a science fiction convention or elsewhere He is however not averse to a good pun as evidenced by a song he co wrote for the Bonzo Dog Doo Dah Band The Holey Cheeses of Nazareth Despite the exhortation of this collection's title this is a perfect opportunity to look back at John's short stories If you've never read any of his fiction before now you have the chance to acquaint yourself with a body of work that while being very much of its time is certainly not in any way out of date
