**Written Expression Disorders** N. Gregg, 1995-05-31 A critical review of the literature on written expression disorders of individuals with learning disabilities The purpose of the book is to shed light on issues concerning definition assessment and interaction for individuals with writing disorders The integrated model of written expression offered draws on the work of cognitive psychology neurolinguistics and sociolinguistics The model illustrates the interrelationship between cognitive and affective processing networks that

influence the selection and use of linguistics and information structures in producing a written text.
