*Encyclopedia of Data Warehousing and Mining* Wang, John, 2005-06-30 Data Warehousing and Mining DWM is the science of managing and analyzing large datasets and discovering novel patterns and in recent years has emerged as a particularly exciting and industrially relevant area of research. Prodigious amounts of data are now being generated in domains as diverse as market research, functional genomics, and pharmaceuticals. Intelligently analyzing these data with the aim of answering crucial questions and helping make informed decisions is the challenge that lies ahead. The Encyclopedia of Data Warehousing and Mining provides a comprehensive critical and descriptive examination of concepts, issues, trends, and challenges in this rapidly expanding field of data warehousing and mining DWM. This encyclopedia consists of more than 350 contributors from 32 countries, 1,800 terms and definitions, and more than 4,400 references. This authoritative publication offers in-depth coverage of evolutions, theories, methodologies, functionalities, and applications of DWM in such interdisciplinary industries as healthcare, informatics, artificial intelligence, financial modeling, and applied statistics, making it a single source of knowledge and latest discoveries in the field of DWM. *Advances in Computer Science and Education*

Anne Xie, Xiong Huang, 2012-01-25 CSE2011 is an integrated conference concentrating its focus on computer science and education. In the proceeding you can learn much more knowledge about computer science and education of researchers from all around the world. The main role of the proceeding is to be used as an exchange pillar for researchers who are working in the mentioned fields. In order to meet the high quality of Springer AISC series, the organization committee has made their efforts to do the following things: Firstly, poor quality papers have been refused after reviewing courses by anonymous referees and experts. Secondly, periodic review meetings have been held around the reviewers about five times for exchanging reviewing suggestions. Finally, the conference organizers had several preliminary sessions before the conference. Through the efforts of different people and departments, the conference will be successful and fruitful. *Web Data Mining and the Development of Knowledge-Based Decision Support Systems*

Sreedhar, G., 2016-12-21 Websites are a central part of today's business world; however, with the vast amount of information that constantly changes and the frequency of required updates, this can come at a high cost to modern businesses. *Web Data Mining and the Development of Knowledge-Based Decision Support Systems* is a key reference source on decision support systems in view of end-user accessibility and identifies methods for extraction and analysis of useful information from web documents.
