## Time For Action:

**Time, Action and Cognition** Françoise Macar, V. Pouthas, William J. Friedman, 2013-04-17 This volume is the outcome of the NATO Advanced Research Workshop on Time Action and Cognition which was held in Saint Malo France in October 1991. The theme time in action and cognition of time was sparked by growing awareness in informal meetings between mostly French speaking time psychologists of the need to bring together time specialists in the areas of development motor behavior attention memory and representations. The workshop was designed to be a forum where different theoretical points of view and a variety of empirical approaches could be presented and discussed. Time psychologists tended to draw conclusions restricted to their specific fields of interest. From our own experience we felt that addressing a common issue possible relationships between time in action and representations of time could lead to a more comprehensive approach. We are indebted to NATO for allowing us to bring this idea to fruition. We take this opportunity as well to express our thanks to Cognisiences Cognisud section an active interdisciplinary research organization for its financial backing and the CNRS for its scientific support.
