Time Consciousness:

Pre-reflective Consciousness Sofia Miguens, Gerhard Preyer, Clara Bravo Morando, 2015-10-16 Pre reflective Consciousness Sartre and Contemporary Philosophy of Mind delves into the relationship between the current analytical debates on consciousness and the debates that took place within continental philosophy in the twentieth century and in particular around the time of Sartre and within his seminal works Examining the return of the problem of subjectivity in philosophy of mind and the idea that phenomenal consciousness could not be reduced to functional or cognitive properties this volume includes twenty two unique contributions from leading scholars in the field Asking questions such as Why we should think that self consciousness is non reflective Is subjectivity first personal Does consciousness necessitate self awareness Do we need pre reflective self consciousness Are ego disorders in psychosis a dysfunction of pre reflective self awareness How does the Cartesian duality between body and mind fit into Sartre s conceptions of consciousness

Memory in the Ontopoiesis of Life Anna-Teresa Tymieniecka, 2009-09-30 From Aristotle to the present memory has been grasped as a trace or impression of lost reality bridging physiological experience and consciousness Philosophers have vainly sought the nature of this bridge The present day physiologizing naturalizing of consciousness is not resolving their congenital continuity in which the very existence and practice of life is rooted We have to change our approach Erwin Straus The Aristotelian congenital ties between memory and temporality acquire crucial significance in our primogenital ontopoiesis of life Tymieniecka It reveals memory to be the factor that carries this coalescence and the becoming of life itself This can be the fruit only of the generative springs of life first phenomenology philosophy the ontopoietic logos of life In this collection we explore memory in the constitution of reality remembering and interpretation consciousness action facts imagination history myths self realization metamorphosis

Thomas, 2023-01-31 Known as the founder of the phenomenological movement this book examines Husserl s various phases of phenomenology during his realist transcendental static genetic and post Crisis of European Sciences periods Consisting of ten carefully researched and thoroughly examined essays this book describes Husserl s concepts and ideas through numerous examples and diagrammatic representations in a bid to elucidate the nuances of phenomenology for its readers Valuable insights into Husserl s realist phase are made in the chapter

on Meaning and the chapters on Natural Attitude Epoch and Phenomenological Reduction while the chapter on Noesis Noema symbolizes the transcendental phase Thomas points out Husserl's transition from static to genetic phenomenology in the chapter on Lived Body with the chapters on Lifeworld and the Notion of the Other later focusing on this perspective Husserl's entire phenomenological space including his pre-phenomenological period are covered in the chapter on Lived Time However the chapters on Phenomenology The Study of Self and Beyond and Consciousness and Intentionality are the fulcrums upon which the edifice of phenomenology turns The final chapter on Presuppositionlessness in phenomenology expresses Thomas' personal enquiries into Husserl's contention that phenomenology is a presuppositionless science This book will be of particular interest to research scholars and post graduate students in the areas of Philosophy and Social Sciences as well as those interested in contemporary Western Philosophy and the history and development of Ideas
