Time Storms

William A. Radford

Time Storms:

Time Storms Jenny Randles,2001 This work explores the evidence that holes in time may occur on a regular basis as a result of a strange phenomenon the time storm The author investigates the paranormal and discusses the idea that time travel is not only possible but that time travellers may have already appeared amongst us *An Automated Real-time Storm Analysis and Storm Tracking Program (WEATRK)* Carlton J. Bjerkaas,1980 The evolution of the WEATRK system is described from the original software obtained under contract in 1977 to the present software configuration The various portions of the software are discussed with emphasis on the algorithms used to determine storm significance and establish the storm track Results of the two year development effort and operational tests show the usefulness of assimilating large amounts of complex data and generating a computer synthesized product easily used in forecast applications The error analysis performed on the storm track forecast accuracy suggests that few of the errors encountered are due to meteorological effects but they are largely due to parameters such as beam width pulse width antenna rotation rate and rounding errors The non meteorological errors appear to average out over large data sets that is the longer the storm track the smaller the forecast error Although the program now uses a three dimensional analysis very little analysis is performed on the velocity and variance fields The usefulness of these fields along with other improvements are considered *Storm Data* ,1961
