Unified Social Science:

Social Science Methodology John Gerring, 2011-12-15 John Gerring's exceptional textbook has been thoroughly revised in this second edition. It offers a one-volume introduction to social science methodology relevant to the disciplines of anthropology, economics, history, political science, psychology, and sociology. This new edition has been extensively developed with the introduction of new material and a thorough treatment of essential elements such as conceptualization, measurement, causality, and research design. It is written for students, long-time practitioners, and methodologists and covers both qualitative and quantitative methods. It synthesizes the vast and diverse field of methodology in a way that is clear, concise, and comprehensive. While offering a handy overview of the subject, the book is also an argument about how we should conceptualize methodological problems. Thinking about methodology through this lens provides a new framework for understanding work in the social sciences.

The Optimum Utilization Of Knowledge Kenneth E. Boulding, Lawrence Senesh, 2019-06-26

We all have more knowledge than we use even so, say the editors of this book, ignorance often governs our actions. Society continues to find ways to misuse knowledge from manipulating information to gain political power to restricting what ideas are explored on university campuses. Thus when some of the best minds in the country met to focus on the optimum utilization of knowledge, it was not an idle academic inquiry. In these proceedings from that conference, which was sponsored by the Academy of Independent Scholars, the contributors examine several of the key aspects of learning: the importance of knowledge in decision making, the role of our educational system and other systems in producing and disseminating knowledge, and the relationship between knowledge and the physiological, psychological, and cultural bases of the learning process. The misuse of knowledge or the overuse of ignorance, the authors note, could threaten the existence of the entire planet if the kind of thinking exemplified by the nuclear arms race prevails.
