Universal Reflections:

Universal Reflections Wes Heber, Lou Heber, 2007 *Crisis and Reflection* J. Dodd, 2006-01-12 In his last work *Crisis of the European Sciences and Transcendental Phenomenology* Edmund Husserl formulated a radical new approach to phenomenological philosophy Unlike his previous works in the *Crisis* Husserl embedded this formulation in an ambitious reflection on the essence and value of the idea of rational thought and culture a reflection that he considered to be an urgent necessity in light of the political social and intellectual crisis of the interwar period In this book James Dodd pursues an interpretation of Husserl's text that emphasizes the importance of the problem of the origin of philosophy as well as advances the thesis that for Husserl the crisis of reason is not a contingent historical event but a permanent feature of a life in reason generally

Design for Inclusion Giulia Bencini, 2023-07-15 Current ideas about human diversity often highlight the importance of the relational and dynamic nature of interactions across different domains of human function activities and participation Universal Design UD is defined as design that is usable by all people to the greatest extent possible and without the need for adaptation or specialization The term universal is intended to embrace human diversity making it the opposite of the one size fits all approach The Universal Design conference series was started in 2012 with the aim of promoting UD as a discipline independent philosophy and approach which can transcend the boundaries between communities of knowledge and communities of practice The first part of this book is a collection of 6 invited papers arising from some of the informal and semi formal discussions and debates which took place as part of the UD 2022 conference in Italy Authors were invited to submit papers presenting real case studies and asked to discuss not only the opportunities and strengths but also the challenges encountered when implementing UD in various domains The second part of the book presents 6 essays by researchers who have worked on different aspects of UD over the years each written from the perspective of the author's own research strand The book will be of interest to all those working in the field of universal design and inclusivity

Reflections on Europe Hans-Åke Persson,Bo Stråth,2007 When Dutch and subsequently French voters rejected the Draft Treaty for a Constitutin for Europe in Spring 2005 many voices called for a pause for reflection This book is in part a result of that moment of reflection We wanted to contribute to the debate about Europe but crucially we sought to do so by taking a step

back from the problem formation and agenda setting of Brussels For the authors of this volume one key to establishing critical distance has been the reappraisal of the historical perspective Another has been the problematisation of Europe as a space as opposed to looking for a definition of borders The authors also seek critical distance through a focus on the tension between Europe as a culture as a polity and as an economy These tensions have often been neglected or even ignored and the relationships have been seen as more or less synonymous and harmonious The aim of this volume then is two fold It wants developing a critical distance to the present Europe to contribute to the vivid academic research and debate on Europe which too often either develops distance without commenting on the present state of affairs or comments on the present without critical distance
