range of challenges in other school and life contexts Dr Martha Bridge Denckla provides parents and educators with general knowledge research findings and practical recommendations about a variety of these developmental conditions including dyslexia dyscalculia ADHD autism spectrum disorder problems with motor coordination and executive dysfunction Inspired by her efforts to explain these conditions to parents over 45 years of clinical practice she provides a science based understanding of the issues in an accessible format She uses the science of cognitive and behavioral neurology to help readers understand how the interrelationships of brain environment and behavior produce these developmental disorders and to provide a basis for parenting and education programs based upon understanding how variations in brain development should guide plans for what is taught when to whom Such developmentally appropriate evidence based differentiated instruction within general education can diminish the demand for separate special education and will thus serve all kinds of brains whether typical or inconvenient
