Solving Elliptic Problems Using Ellpack:

Solving Elliptic Problems Using ELLPACK John R. Rice, Ronald F. Boisvert, 2012-12-06 ELLP ACK is a many faceted system for solving elliptic partial differential equations It is a forerunner of the very high level problem solving environments or expert systems that will become common in the next decade While it is still far removed from the goals of the future it is also far advanced compared to the Fortran library approach in common current use Many people will find ELLP ACK an easy way to solve simple or moderately complex elliptic problems Others will be able to solve really hard problems by digging a little deeper into ELLP ACK ELLP ACK is a research tool for the study of numerical methods for solving elliptic problems Its original purpose was for the evaluation and comparison of numerical software for elliptic problems Simple examples of this use are given in Chapters 9 11 The general conclusion is that there are many ways to solve most elliptic problems there are large differences in their efficiency and the most common ways are often less efficient sometimes dramatically so [Solving](#)

Intelligent Mathematical Software Systems Elias N. Houstis, John R. Rice, Robert Vichnevetsky, 1990 Most of the well known mathematical software systems are batch oriented though in the past few years there have been attempts to incorporate knowledge or expertise into these systems A number of developments have helped in making the systems more powerful and user friendly algorithm parameter selection for the solution of well defined mathematical engineering problems parallel computing computer graphics technology interface development tools and of course the years of experience with

these systems and the increase in available computing power have made it practical to fulfill the potential seen in the early years of their development This book covers four main areas of the subject Application Oriented Expert Systems Advisory Systems Knowledge Manipulation Issues and User Interfaces

Symbolic and Numerical Computation for Artificial Intelligence Bruce R. Donald, Deepak Kapur, Joseph L. Mundy, 1992

Over the last decade there has been considerable progress in investigating methods of symbolic mathematics in many application areas of computer science and artificial intelligence such as engineering design solid and geometric modelling robotics and motion planning and machine vision This research has produced few applications within engineering and robotics because of the combinatorial cost of symbolic techniques Therefore it is essential to investigate approaches for systematic integration of symbolic with numerical techniques which are efficient for handling the huge amount of data that arises in practical applications while at the same time maintain a logically consistent solution framework Symbolic and Numerical Computation for Artificial Intelligence gives an overview of applications in machine vision robotics and engineering design where there is a need for integrating symbolic and numerical methods It also illustrates the case for an integrated symbolic and numerical environment to support the needs of these applications This book will be essential reading for researchers in applied mathematics symbolic and algebraic manipulation and applied artificial intell
