

Problem Of Universals: Realism Vs. Nominalism

Debated at least since the days of Plato, the question known as the “problem of universals” reached a high point of discussion during the Middle Ages. The problem posits two theories about the nature of reality that oppose each other and argue the question of whether “universal” things are in fact “real.” The question is whether or not a property of something is “real.”

A property is an inherent quality or label that describes that thing. For example, all balls share the property of being shaped like a sphere. However, for properties that are not physical, observable, or measurable, philosophers debated whether the property was real. For an abstract property such as love, justice, or beauty, philosophers have disagreed throughout history about “realness”. For example, all laws are assumed to share the property of fairness, but do they? And is fairness “real”?

Realism is the philosophical position that posits that universals are just as real as physical, measurable material. Nominalism is the philosophical position that promotes that universal or abstract concepts do not exist in the same way as physical, tangible material. A debate that heavily influenced multiple areas of study throughout the Middle Ages, it was of specific importance for theological scholars. Questions about miracles, God’s love, and salvation were central in the minds of medieval philosophers, and they often supported their opinions very sternly—it was a matter of eternal truth.

One of the most important realist philosophers of the Middle Ages was Thomas Aquinas, who argued an Aristotelian theory that essence and existence were clearly distinct. About two centuries later, William of Ockham was one of the most important High Middle Ages nominalist philosophers; he argued the extreme position for his day that universals are no more than psychological labels.

How Do Realists Understand Reality?

Realists postulate the existence of two kinds of entities, particulars, and universals. Particulars resemble each other because they share universals; for example, each particular dog has four legs, can bark, and has a tail. Universals can also resemble each other by sharing other universals; for example, wisdom and generosity resemble each other in that they are both virtues.

The intuitive plausibility of realism is evident. Realism allows us to take seriously the subject-predicate structure of discourse through which we represent the world. When we say that Socrates is wise it is because there are both Socrates (the particular) and wisdom (the universal) and the particular exemplifies the universal.

The Problem of American Realism Michael Davitt Bell, 1993-04-15 Ever since William Dean Howells declared his realism war in the 1880s literary historians have regarded the rise of realism and naturalism as the great development in American post Civil War fiction Yet there are many problems with this generalization It is virtually impossible for example to extract from the novels and manifestoes of American writers of this period any consistent definitions of realism or naturalism as modes of literary representation Rather than seek common traits in widely divergent realist and naturalist literary works Michael Davitt Bell focuses here on the role that these terms played in the social and literary discourse of the 1880s and 1890s Bell argues that in America realism and naturalism never achieved the sort of theoretical rigor that they did in European literary debate Instead the function of these ideas in America was less aesthetic than ideological promoting as reality a version of social normalcy based on radically anti literary and heavily gendered assumptions What effects Bell asks did ideas about realism and naturalism have on writers who embraced and resisted them To answer this question he devotes separate chapters to the work of Howells and Frank Norris the principal American advocates of realism and naturalism in the 1880s and 1890s Mark Twain Henry James Stephen Crane Theodore Dreiser and Sarah Orne Jewett Bell reveals that a chief function of claiming to be a realist or a naturalist was to provide assurance that one was a real man rather than an effeminate artist Since the 1880s Bell asserts all serious American fiction writers have had to contend with this problematic conception of literary realism The true story of the transformation of American fiction after the Civil War is the history of this contention a history of individual accommodations evasions holding
