The Problem Of Universals:

The Problem of Universals Andrew B. Schoedinger, 1992 [The Problem of Universals in Early Modern Philosophy](#) Stefano Di Bella, Tad M. Schmaltz, 2017 This is a collection of essays from an international group of scholars that explore the ways in which the ancient problem of universals was transformed in modern philosophy Essays consider the various forms of Platonism conceptualism and nominalism in the writings of a broad range of modern thinkers [The Problem of Universals in Contemporary Philosophy](#) Gabriele Galluzzo, Michael J. Loux, 2015-07-16 The problem of universals is one of the most fascinating and enduring topics in the history of metaphysics with roots in ancient and medieval philosophy The contributors to this book provide a critical up to date and original overview of the contemporary debate on the problem of universals

[Five Texts on the Mediaeval Problem of Universals](#) Paul V. Spade, 1994-03-15 New translations of the central mediaeval texts on the problem of universals are presented here in an affordable edition suitable for use in courses in mediaeval philosophy history of mediaeval philosophy and universals Includes a concise Introduction glossary of important terms notes and bibliography **The Problem of Universals from Boethius to John of Salisbury** Roberto Pinzani, 2018-06-12 The problem of universals is one of the main philosophical issues In this book the author reconstructs the history of the problem considering a selection of medieval representative texts and authors The source of medieval and postmedieval debate is identified in the Socratic Platonic survey on the definition of concepts In the Categories Aristotle discusses important topics concerning the relations that exist between logical terms In particular he establishes a kind of predication principle categorial terms have a certain predication relation if and only if some facts expressed by ordinary sentences hold The Categories also because of their particular disciplinary status halfway between logic and metaphysics leave a number of questions open Among these questions a particularly intriguing one is Porphyry's riddle are there genera and species And if there are such things what are they like [The Problem of Universals](#) Stephen Lyman Peterson, 1968 *The Problem of Universals in Indian Philosophy* Raja Ram Dravid, 2000-12-31 The author gives a critical and comprehensive study of the fundamental problem of universals in Indian Philosophy The centre of the study is the controversy between the Nyaya Vaisesika and the Mimamsa realists on the one hand and the Buddhist nominalists on the other The author discusses not only the epistemological and metaphysical approach to the problem of universals but also the semantic approach made by the various systems of Indian Philosophy In this context the view of the Grammarions with special reference to Bhartrhari has been discussed in some detail A brief but critical analysis of some of the main trends of thought on universals in Western Philosophy beginning from Plato to the contemporary philosophers has also been given Besides his scholarly and eminently readable treatment of fundamental problem of universals the author has attempted to give his own solution of the problem It is based on the recurrent identities and similarities which are the principles of grouping and which form the foundation of our thought and speech **The Key to the Study of St. Thomas** Francesco Olgiati, 1924 **What's in a Doughnut**

Hole? Suki Finn, 2026-05-07 Does a doughnut hole exist What makes a sandwich a sandwich Can the baker who only bakes for those who don't bake for themselves bake for herself Using food to explore classic philosophical puzzles and paradoxes about how we know things abstract ideas about our world language and about how we define the truth this book will get your brain whirring and your stomach grumbling Suki Finn a Philosophy Lecturer at Royal Holloway University of London serves up plenty of philosophical food for thought enough to whet the appetite of the novice and to satisfy philosophers hungry for a different take on familiar themes What's in a Doughnut Hole gives us new ways to think about the world and to understand our place in it *Aspects of the Problem of Universals* Donald Brownstein, 1973 **The Jewish Quarterly Review** Cyrus Adler, Solomon Schechter, Abraham Aaron Neuman, Solomon Zeitlin, 1917 **Problems of Philosophy** Gustavus Watts Cunningham, 1924 **The Philosophical Review** Jacob Gould Schurman, James Edwin Creighton, Frank Thilly, Gustavus Watts Cunningham, 1914 An international journal of general philosophy **A Re-examination of the Problem of Universals** Jimmy Berger, 2021 My aims in this project are to address what the problem of universals is to provide a comprehensive account of its major solutions to evaluate those solutions and to provide my own conclusions about the problem My primary thesis is that philosophers have been wrong to look for a universally applicable theory to account for the problem of universals and instead should accept the profound complexity of reality and develop more modest theories that are applicable in limited domains **The Metaphysics and Natural Philosophy of John Buridan** J. M. M. H. Thijssen, Jack Zupko, 2001 A collection of original articles by a dozen scholars on the work of the influential 14th century philosopher John Buridan this book extends Buridan's reputation in logic to metaphysics and natural philosophy showing how he brought a fresh approach to solving some of the classic problems of philosophy **The Problem of Attributes in Spinoza** Warren Leslie Kessler, 1971 Resemblance Nominalism Gonzalo Rodriguez-Pereyra, 2002-07-04 Gardeners poets lovers and philosophers are all interested in the redness of roses but only philosophers wonder how it is that two different roses can share the same property Are red things red because they resemble each other Or do they resemble each other because they are red Since the 1970s philosophers have tended to favour the latter view and held that a satisfactory account of properties must involve the postulation of either universals or tropes But Gonzalo Rodriguez-Pereyra revives the dormant alternative theory of resemblance nominalism showing first that it can withstand the attacks of such eminent opponents as Goodman and Armstrong and then that there are reasons to prefer it to its rival theories The clarity and rigour of his arguments will challenge metaphysicians to rethink their views on properties *History of Philosophy* William Turner, 1903 The purpose of the writer in compiling this text book has been so to set forth the succession of schools and systems of philosophy as to accord to Scholasticism a presentation in some degree adequate to its importance in the history of speculative thought Preface PsycINFO Database Record c 2010 APA all rights reserved The Critical Value of Concepts and Universal Ideas Patrick M. Dalos, 1960 *Duns Scotus and the Problem of Universals* Todd Bates, 2010-08-26 John Duns

Scotus d 1308 known as the subtle doctor among medieval schoolmen produced a formidable philosophical theology using and adapting an Aristotelian metaphysical framework Critical of Thomas Aquinas grand Summas Scotus died before producing a final synthesis of his own Indeed his work left in disarray for centuries has only recently become available in an edited format Contemporary metaphysics taking up the problem of universals treads on ground already well worked by Scotus Duns Scotus and the Problem of Universals shows how Scotus treatment of the problem of universals is both coherent and even by contemporary standards cogent Todd Bates recovers and sets out Scotus understanding of the structure of material substance reconstructs Scotus arguments for universals and haecceities and shows how Scotus theory applies to the metaphysics of the Incarnation This book makes an important contribution to a neglected but crucial area of Scotus scholarship
