The Soldiers Load:

The Soldiers Load and the Mobility of a Nation S. L. A. Marshall, 1980 **Making the Soldier Decisive on Future Battlefields** National Research Council, Division on Engineering and Physical Sciences, Board on Army Science and Technology, Committee on Making the Soldier Decisive on Future Battlefields, 2013-05-10

The U S military does not believe its soldiers sailors airmen and marines should be engaged in combat with adversaries on a level playing field Our combat individuals enter engagements to win To that end the United States has used its technical prowess and industrial capability to develop decisive weapons that overmatch those of potential enemies In its current engagement what has been identified as an era of persistent conflict the nation s most important weapon is the dismounted soldier operating in small units Today s soldier must be prepared to contend with both regular and irregular adversaries Results in Iraq and Afghanistan show that while the U S soldier is a formidable fighter the contemporary suite of equipment and support does not afford the same high degree of overmatch capability exhibited by large weapons platforms yet it is the soldier who ultimately will play the decisive role in restoring stability Making the Soldier Decisive on Future Battlefields establishes the technical requirements for overmatch capability for dismounted soldiers operating individually or in small units It prescribes technological and organizational capabilities needed to make the dismounted soldier a decisive weapon in a changing uncertain and complex future environment and provides the Army with 15 recommendations on how to focus its efforts to enable the soldier and tactical small unit TSU to achieve overmatch

The Factors of Soldier's Load Stephen J. Townsend, ARMY COMMAND AND GENERAL STAFF COLL FORT LEAVENWORTH KS., 1994 This study examines the factors that cause or contribute to the overloading of dismounted combat soldiers in the Army of the 1990 s This examination considers the body of literature on the subject primarily post World War II to identify what factors cause soldiers to carry too much weight into battle The goals of the study are to identify the causative factors and increase leader understanding of the problem and review previous recommendations towards solving it From the research the study identifies twelve factors that cause or contribute to soldier s overload lack of appreciation of the problem fear and fatigue the fear of risk the fire load the drag of orthodoxy failures of discipline and the enforcement of standards myths of peacetime training the nature of the soldier lack of transport the effects of technology terrain and weather and physical conditioning Load Soldier s load Rucksack Physical conditioning Combat load Fighting load Sustainment load Approach march load Fear Fatigue Risk Training Transport Technology

The Soldier's Heart and the Effort Syndrome Sir Thomas Lewis, 1920 *The Military Surgeon*, 1925 *American Soldiers* Peter S. Kindsvatter, 2003 Some warriors are drawn to the thrill of combat and find it the defining moment of their lives Others fall victim to fear exhaustion impaired reasoning and despair This book synthesizes the wartime experiences of American soldiers from the doughboys of World War I to the grunts of Vietnam Focusing on both soldiers and marines it draws on histories and memoirs oral histories psychological and sociological studies and even fiction to show that their experiences remain
