

DESIGNING FOR ALL AGES & ABILITIES

Every design must meet the needs of a diverse range of potential bike riders. Across North America, however, many existing bike facility design practices are limited to only the oldest people being and exclude many who might otherwise use them.

IN AN AGE OF GROWING POPULATION that has a high percentage of people older than 50, it is essential to design bike facilities that are usable by all people, including those with physical disabilities. This includes not only older people, but also people with physical disabilities of all ages. Designing bike facilities that are usable by all people is a key goal of the Urban Bikeway Design Guide.
