The Egyptian Labor Market Caroline Krafft, Ragui Assaad, 2022-03-03 The Egyptian economy has faced many challenges in the decade since the 2011 Arab Spring uprisings Not only was job creation anaemic from 2012 to 2018 but new jobs were also of low quality characterized by informality and vulnerability to economic shocks These challenges pushed many in Egypt especially the most vulnerable into a more precarious labor market situation Then in the midst of economic recovery brought on by tough reform measures adopted in 2016 and 2017 the country was hit by the widespread disruption of a global pandemic This book examines the plight of Egypt's most vulnerable groups by focusing on the intersection of gender and economic vulnerability in the labor market With this emphasis on vulnerability and a lens that is sensitive to gender differences and inequities the contributors to this volume use data from the most recent wave of a unique longitudinal survey to illuminate different aspects of Egyptians lives The aspects they explore include labor supply behavior the ability to access good quality and well paying jobs the evolution of wages and wage inequality the school to

work transition of youth the decline in public sector employment international and internal migration the situation of rural women access to social protection food security vulnerability to shocks and coping mechanisms health status and access to health care services These analyses are prescient in understanding the axes of vulnerability in Egyptian society that became all too salient during the COVID 19 pandemic *Urbanization And Urban Policies In Pacific Asia* Roland J Fuchs,2019-09-18 This book is the outcome of the Conference on Population Growth Urbanization and Urban Policies in the Asia Pacific Region held in Honolulu during 8 12 April 1985 It provides wide attention among development planners urban managers and scholars in the field of urban and development planning **Handbook of Regional and Urban Economics** Peter Nijkamp,E.S. Mills,P.C. Cheshire,1986 Fifteen essays in this handbook are divided into four parts Part I surveys basic spatial and spatially related research Part II surveys literature on specific urban markets Part III is devoted to studies of urban development and problems in developing countries Part IV contains papers on specific urban problems and sectors

Testing for Labor Market Duality Wim P. M. Vijverberg,J. van der Gaag,1990 Research on labor market duality in the context of developing countries has identified the secondary segment of the labor market more with the self employed than with salaried employees A few recent tests derive information on the existence of duality and the relative magnitudes of the primary and secondary sectors entirely from the structure of the wage equation Furthermore as an innovation relevant to the current state of the art this paper estimates an indicator of the degree of formality of the job that a worker holds and integrates this indicator into the structure of the wages The indicator is found to have some effect on the structure of the wage equation which therefore suggests the existence of duality even though duality is measured by the indicator as a continuum rather than as a dichotomous split Analysis of the spread of the indicator reveals a single mode in a distribution that can be viewed as the mixture of two normal distributions Thus the Ivorian labor market is one with a primary and a secondary pole and with substantial overlap between those poles so as to deny the rigorous separation that is common in discussion about labor market duality *Population Growth and Economic Development* David Gale Johnson,Ronald Demos Lee,1987 **Business Administration Reading Lists and Course Outlines: Industrial relations** ,1985

Rural-urban Relations and Regional Development Fu-chen Lo,1981 **Staff Studies for the World Economic Outlook** International Monetary Fund,1986-01-01 This paper reviews recent analytical and empirical research on the determination of employment to provide a framework for evaluating the merits of alternative policies to cope with unemployment Particular emphasis is placed on the mechanisms of employment and wage determination described in recent studies The lack of any systematic relationship between countries long run growth and employment performances reflects the fact that output per person employed labor productivity or conversely the labor intensity of production has developed quite differently across countries The main mechanism through which the rise in real wages has prevented greater employment gains in Europe over the past ten to fifteen years seems to have been a substitution of capital for labor which

has lowered the labor intensity of production significantly more than in the United States There are a number of important caveats with respect to the apparent relationship between differences in employment and labor cost developments across countries

Scoville,1991 **Proceedings of the World Bank Annual Conference on Development Economics** ,1991 *The Cumulative Book Index* ,1983 A world list of books in the English language *The New Palgrave Dictionary of Economics* ,2016-05-18 The award winning The New Palgrave Dictionary of Economics 2nd edition is now available as a dynamic online resource Consisting of over 1 900 articles written by leading figures in the field including Nobel prize winners this is the definitive scholarly reference work for a new generation of economists Regularly updated This product is a subscription based product
