Handbook of Effective Inclusive Schools James McLeskey, Fred Spooner, Bob Algozzine, Nancy, L. Waldron, 2014-05-16
Over the last decade the educational context for students with disabilities has significantly changed primarily as a result of mandates contained in NCLB and IDEA The purpose of this book is to summarize the research literature regarding how students might be provided classrooms and schools that are both inclusive and effective Inclusive schools are defined as places where students with disabilities are valued and active participants in academic and social activities and are given supports that help them succeed Effectiveness is addressed within the current movement toward multi tiered systems of support and evidence based practices that meet the demands of high stakes accountability **Resources in Education**, 1982

Macro cognition in Teams Dr C A P Smith, Dr Michael P Letsky, Dr Norman W Warner, Dr Stephen M Fiore, 2012-10-01 Team collaboration involves many operational tasks such as team decision making or course of action selection developing shared understanding and intelligence analysis These operational tasks must be performed in many situations often under severe time pressure with information and knowledge uncertainty large amounts of dynamic information and across different team characteristics Recent research in this area has focused on various aspects of human collaborative decision making and the underlying cognitive processes while describing those processes at different levels of detail making it difficult to compare research results The theoretical construct of macro cognition in teams was developed to facilitate cognitive research in team collaboration which will enable a common level of understanding when defining measuring and discussing the cognitive processes in team collaboration Macro cognition is defined as both the internalized and externalized mental processes employed by team members in complex one of a kind collaborative problem solving Macro cognition in Teams provides readers with a greater understanding of the macro cognitive processes which support collaborative team activity showcasing current research theories methodologies and tools It will be of direct relevance to academics researchers and practitioners interested in group team interaction performance development and training
