of their complexities but also having the tenacity and courage to do so they have stood side by side with men and helped to share the helpful and needed knowledge of health optimization with the world It is with great pleasure and respect that we dedicate this issue to all of the women in the world striving to promote good health strong lives and clearer minds Although we have had and will continue to have female authors and subject matter in past and future issues every article contained inside this particular issue is either written by a female author or purely feminine in subject matter This is our way to take a moment to highlight and thank all those women out there doing their thing At Biohackers Magazine we believe no we know that every woman s thought and word is just as important as every man s And we are here to provide this magazine as the ontic evidence to that Without further ado enjoy your new woman ful issue *Consumer Genetic Technologies* I. Glenn Cohen,Nita A. Farahany, Henry T. Greely, Carmel Shachar, 2021-09-16 For the average person genetic testing has two very different faces The rise of genetic testing is often promoted as the democratization of genetics by enabling individuals to gain insights into their unique makeup At the same time many have raised concerns that genetic testing and sequencing reveal intensely personal and private information As these technologies become increasingly available as consumer products the ethical legal and regulatory challenges presented by genomics are ever looming Assembling multidisciplinary experts this volume evaluates the different models used to deliver consumer genetics and considers a number of key questions How should we mediate privacy and other ethical concerns around genetic databases Does aggregating data from genetic testing turn people into products by commercializing their data How might this data reduce or exacerbate existing healthcare disparities Contributing authors also provide guidance on protecting consumer privacy and safety while promoting innovation
