navigate the complexities of developing such projects and attract the necessary private capital to complete them This Guide is intended to provide a general resource that will begin to develop the Federal employee s awareness and understanding of the project developer s operating environment and the private sector s awareness and understanding of the Federal environment Because the vast majority of the investment that is required to meet the goals for large scale renewable energy projects will come from the private sector this Guide has been organized to match Federal processes with typical phases of commercial project development FEMP collaborated with the National Renewable Energy Laboratory NREL and professional project developers on this Guide to ensure that Federal projects have key elements recognizable to private sector developers and investors The main purpose of this Guide is to provide a project development framework to allow the Federal Government private developers and investors to work in a coordinated fashion on large scale renewable energy projects The framework includes key elements that describe a successful financially attractive large scale renewable energy project
