

SOCIAL CHANGE

Social change is defined by sociologists as alterations in the basic structures of society or a social group.

APPROACHES

Structural-functionalism

Social change should serve the best interests of society, with the goal of maintaining equilibrium and balance within the social system.

Conflict Theory

Social change happens suddenly when conflict boils over, upending the status flow.

EXAMPLE

The Industrial Revolution

The Industrial Revolution was a period of significant social and economic change marked by the widespread development of new technologies, transportation and communication systems, and the growth of factories and mass production. Urbanization, labor rights, and women's rights took center stage.

Exploring Social Change Charles L. Harper, Kevin T. Leicht, 2015-08-13 For one semester junior senior and beginning level graduate courses in Social Change An introduction to social change that highlights theories on key topics including social change innovation social movements and revolutions Exploring Social Change America and the World 6e is a comprehensive introduction to social change The last part of the book shifts explicitly to the global level to analyze population and environmental issues and globalization Within this framework the book discusses topics about change and its problems familiar in sociology and social science

Politics and Social Change Ishwaran, 2022-09-12

Complexity Perspectives in Innovation and Social Change David Lane, Denise Pumain, Sander Ernst van der Leeuw, Geoffrey West, 2009-02-13 Innovation is nowadays a question of life and death for many of the economies of the western world Yet due to our generally reductionist scientific paradigm invention and innovation are rarely studied scientifically Most work prefers to study its context and its consequences As a result we are as a society lacking the scientific tools to understand improve or otherwise impact on the processes of invention and innovation This book delves deeply into that topic taking the position that the complex systems approach with its emphasis on emergence is better suited than our traditional approach to the phenomenon In a collection of very coherent papers which are the result of an EU

funded four year international research team s effort it addresses various aspect of the topic from different disciplinary angles One of the main emphases is the need in the social sciences to move away from neo darwinist population thinking to organization thinking if we want to understand social evolution Another main emphasis is on developing a generative approach to invention and innovation looking in detail at the contexts within which invention and innovation occur and how these contexts impact on the chances for success or failure Throughout the book is infused with interesting new insights but also presents several well elaborated case studies that connect the ideas with a substantive body of real world information
