Strands Of System:

Bridge Safety, Maintenance, Management, Life-Cycle, Resilience and Sustainability Joan Ramon Casas, Dan M. Frangopol, Jose Turmo, 2022-06-27 Bridge Safety Maintenance Management Life Cycle Resilience and Sustainability contains lectures and papers presented at the Eleventh International Conference on Bridge Maintenance Safety and Management IABMAS 2022 Barcelona Spain 11-15 July 2022. This e-book contains the full papers of 322 contributions presented at IABMAS 2022, including the T.Y. Lin Lecture, 4 Keynote Lectures, and 317 technical papers from 36 countries all around the world. The contributions deal with the state of the art as well as emerging concepts and innovative applications related to the main aspects of safety, maintenance, management, life cycle, resilience, sustainability, and technological innovations of bridges. Major topics include advanced bridge design, construction and maintenance approaches, safety, reliability, and risk evaluation, life cycle management, life cycle resilience, sustainability, standardization, analytical models, bridge management systems, service life prediction, structural health monitoring, non-destructive testing, and field testing, robustness, and redundancy, durability enhancement, repair and rehabilitation, fatigue and corrosion, extreme loads, needs of bridge owners, whole life costing, and investment for the future, financial planning, and application of information and computer technology, big data analysis, and artificial intelligence for bridges, among others. This volume provides both an up-to-date overview of the field of bridge engineering and significant contributions to the process of making more rational decisions on bridge safety, maintenance, management, life cycle, resilience, and sustainability of bridges for the purpose of enhancing the welfare of society. The volume serves as a valuable reference to all concerned with and/or involved in bridge structure and infrastructure systems, including students, researchers, and practitioners from all areas of bridge engineering.

Basic Principles of Cable Supported Bridges DR. B. C. ROY, 2024-05-15. This book presents a brief design approach for cable supported bridges based on experiences from past projects, both domestic and international, that were shared by experts in bridge engineering. The specifications outlined in the book are adopted in the design of several cable stayed and extradosed bridges in India and abroad. These specifications are in conformance with the global best practices. In addition, reference literature has been consulted during the compilation of various sections of the book. In this endeavor, the author sought suggestions and collective guidance from some eminent specialists in cable supported bridges from the USA, Europe, and Asia in order to provide a glimpse of practices across the globe. In this book, the author has attempted to highlight the basic principles of cable supported bridges, and the same should be used only as a guideline for design. It is believed that the reader would have acquired sufficient knowledge of analysis and design of complex bridges before going through this book. Lastly, brief case studies of two notable Indian bridges, the Second Vivekananda Extradosed Nivedita Bridge and Burdwan Cable Stayed Bridge, are provided. While the former is an example of extradosed structure for Hooghly River crossing, the latter is a three-pylon first-time-in-India cable stayed bridge over railway tracks. These examples will elucidate the purpose of this book.
