Symbolic Communities:

Symbolic Communities Albert Hunter, 1982 **Symbolic Construction of Community** Anthony P. Cohen, 2013-03-07
Anthony Cohen makes a distinct break with earlier approaches to the study of community which treated the subject in largely structural terms His view is interpretive and experiential seeing the community as a cultural field with a complex of symbols whose meanings vary among its members He delineates a concept applicable to local and ethnic communities through which people see themselves as belonging to society The emphasis on boundary is sensitive to the circumstances in which people become aware of the implications of belonging to a community and describes how they symbolise and utilise these boundaries to give substance to their values and identities *The Symbolic Construction of Community* Anthony Paul Cohen, 1989 Gathering Hopewell Christopher Carr, D. Troy Case, 2005-11-22 Among the most socially and personally vocal archaeological remains on the North American continent are the massive and often complexly designed earthen architecture of Hopewellian peoples of two thousand years ago their elaborately embellished works of art made of glistening metals and stones from faraway places and their highly formalized mortuaries In this book twenty one researchers in interwoven efforts immerse themselves and the reader in this vibrant archaeological record in order to richly reconstruct the societies rituals and ritual interactions of Hopewellian peoples By finding the faces actions and motivations of Hopewellian peoples as individuals who constructed knowable social roles the authors explore in a personalized and locally contextualized manner the details of Hopewellian life leadership its sacred and secular power bases recruitment and formalization over time systems of social ranking and prestige animal totemic clan organization kinship structures and sodalities gender roles prestige work load and health community organization in its tri scalar residential symbolic and demographic forms intercommunity alliances and changes in their strategies and expanses over time and interregional travels for power questing pilgrimage healing tutelage and acquiring ritual knowledge This book is useful to scholars graduate students and advanced undergraduates interested in the workings and development of social complexity at local and interregional scales recent theoretical developments in the anthropology of the topics listed above the prehistory of eastern North America its history of intellectual development and Native American ritual symbolism and belief **The Symbolic Construction of Community** Anthony P. Cohen, 2007 Sacred Games, Death, and Renewal in the Ancient Eastern Woodlands A. Martin Byers, 2011-01-16 The book presents an account of the Ohio Middle Woodland period embankment earthworks ca 100 B C to A D 400 that is radically different from the prevailing theory Byers critically addresses all the arguments and characterizations that make up the current treatment of the embankment earthworks and then presents an alternative interpretation This unconventional view hinges on two basic social characterizations the complementary heterarchical community model and the cult sodality heterarchy model Byers posits that these two models interact to characterize the Ohio Middle Woodland period settlement pattern the community was constituted by autonomous social formations clans based on

kinship and sodalities based on companionship The individual communities of the region each have their clan components dispersed within a fairly well defined zone while the sodality components of the same set of region wide communities ally with each other and build and operate the embankment earthworks This dichotomy is possible only because the clans and sodalities respect each other as relatively autonomous the affairs of the clans focusing on domestic and family matters remain outside the concerns of the sodalities and the affairs of the sodalities focusing on world renewal and sacred games remain outside the concerns of the clans Therefore two models are required to understand the embankment earthworks and no individual earthwork can be identified with any particular community This radical interpretation grounded in empirical archaeological data as well as the in depth overview of the current theory of the Ohio Middle Woodland period make this book a critically important addition to the perspective of scholars of North American archaeology and scholars grappling with prehistoric social systems
