Proceedings of the Sixteenth Annual Conference of the Cognitive Science Society Ashwin Ram, Kurt Eiselt, 2019-05-23

This volume features the complete text of all regular papers posters and summaries of symposia presented at the 16th annual meeting of the Cognitive Science Society **From Ælfric to the New York Times**, 2023-12-21 The twenty papers of this volume published to honour Gunnel Tottie are of interest to everyone concerned with the study of the English language The collection is a convincing argument for an approach to language studies based on the analysis of computerized corpora Though this is not an introduction to the field but a series of highly specialized studies readers get a good overview of the work being done at present in English computer corpus studies English corpus linguistics though basically concerned with the study of varieties of English goes far beyond the simple ordering and counting of large numbers of examples but is deeply concerned with linguistic theory based on real language data The volume includes sections on corpora of written and spoken present day English historical corpora contrastive corpora and on the application of corpus studies to teaching purposes

The Semantic Salience Hierarchy Model Jingyu Zhang, 2007 This empirical study examines the learning problem of the argument structure of psych predicates such as The dog frightens John and the related V ing adjectives such as The dog is frightening to John The problem is theoretically interesting because of the marked nature of the thematic role mapping of these sentences in relation to the principle of the Uniformity of Theta Assignment Hypothesis UTAH The problem is highly relevant to our understanding of second language acquisition as this is known to be a prevalent difficulty among language learners The author has framed the learning problem within a coherent parametric framework drawing on a sophisticated critical review of the syntax semantics literature and theories of L2 development The author has specifically developed a theory the Semantic Salience Hierarchy Model SSHM to explain the learning process The significance of the model is not confined only to this particular study as the issues related to the L2 acquisition of other causative verbs can also be examined within this model The findings of this study also bear implications to TESOL **Encyclopedia of Language and**
