Technology and Values in American Civilization Stephen H. Cutcliffe, Judith Adams-Volpe, Christine Roysdon, 1980
Civilizing the Machine John F. Kasson, 1999-05-17 A major theme in American history has been the desire to achieve a genuinely republican way of life that values liberty order and virtue This work shows us how new technologies affected this drive for a republican civilization a question as vital now as ever *Technology and Civilization* Mary A. Technology and Culture, 1991 **Science, Technology and Society**, 1994 **Thinking through Science and Technology** Glen Miller, Helena Mateus Jerónimo, Qin Zhu, 2023-03-27 Groundbreaking in its range of disciplines and cultural backgrounds Thinking through Science and Technology explores how individual and societal beliefs values and actions are transformed by science technology and engineering Practical and theoretical insights from philosophers policymakers STS scholars and engineers illuminate the promise perils and paradoxes that arise with technoscientific change This collection of original research develops a philosophical understanding of technology and its inscription in a wider web of social and political meanings values and civilizational change It explores foundational beliefs at the core of engineering education and practice with an emphasis on the movement of ideas between Western and Chinese scholars as well as the complex interwoven relationship between ideas from religion science and technology as they have evolved in the West Contributors also critically examine the forces and frameworks that shape the development and evaluation of scientific practice and the innovation and adoption of technology with an emphasis on national and global policy The volume offers a critical and timely reflection on science and technology that counters trends toward technological optimism on the one hand and disciplinary and cultural regionalization on the other Chapters written by prominent and promising scholars from around the world make this a global resource its breadth and clarity make it a superb introduction for those new to its fields It serves as an essential reference for established scholars as well as anyone seeking a more comprehensive understanding of social and technoscientific entanglements that permeate contemporary life List of contributors Gordon Akon Yamga Jennifer Karns Alexander Andoni Alonso Pamela Andanda Larry Arnhart Li Bocong Albert Borgmann Adam Briggie Jose A Lopez Cerezo Mark Coeckelbergh Daniel Crzuelle Neelke Doorn Jean Pierre Dupuy Andrew Feenberg Jose Luis Garcia Tricia Glazebrook Janna van Grunsven J Britt Holbrook Helena Jerónimo Tong LI Yongmou LIU Lavinia Marin Glen Miller Carl Mitcham Suzanne Moon Byron Newberry Jean Robert Sabine Roeser Taylor Stone Sajay Samuel Daniel Sarewitz Jen Schneider Jos Antonio Ullate Carlos Verdugo Serna Nan WANG **Journal of American Culture**, 1981 **Panel on Science and Technology, Eleventh Meeting: the Management of Information and Knowledge, Proceedings...91-2. Science and Astronautics, 1970 **The Intellectual Appropriation of Technology** Mikael Hard, Andrew Jamison, 1998-10-27 This book examines the broad range of social and intellectual responses to technology in the first four decades of this century and suggests that these responses set the terms that continue to govern contemporary

debates Starting around 1900 technology became a lively subject for debate among intellectuals writers and other opinion leaders The expansion of the machine into ever more areas of social and economic life had led to a need to interpret its meanings in a more comprehensive way than in the past World War I and its aftermath shifted the terms of this ongoing debate by underlining both the potential dangers of technology and its centrality to modern life This book examines the broad range of social and intellectual responses to technology in the first four decades of this century and suggests that these responses set the terms that continue to govern contemporary debates Focusing on the broader contexts within which intellectual positions are formed the book highlights the ways in which attitudes toward technology were shaped in a wide variety of national and organizational settings A common theme is that in debating technology people drew on their distinctive national symbols and cultural traditions By emphasizing the interplay between debates on technology and the making of modernity the book challenges standard historical accounts of the early twentieth century Contributors Ketil G Andersen Aant Elzinga Tor Halvorsen Mikael H rd Kjetil Jakobsen Andrew Jamison Catharina Landstr m Conny Mithander Sissel Myklebust Dick van Lente Peter Wagner
