Outsourcing Technology Robin Hastings, 2014-03-18 Here acclaimed technology author and speaker Robin Hastings brings both her own experience as a library s IT manager with outsourcing technical functions including email and network backups as well as basic hardware maintenance and that of others in her network of library techies to round out the book to help libraries of all types and sizes save money and expand services Outsourced functions covered here range from using an outside firm to assist in creating a new library website to outsourcing basic computer maintenance and network administration Outsourcing Technology A Practical Guide for Librarians has something for every size and type of library Libraries with no IT people at all will learn how to create and manage an IT department made up of outside contractors and providers Libraries with small IT departments will learn how to supplement their existing skills and offload staff intensive but non essential functions to

outsourced providers in order to focus on mission critical functions in house and Libraries with large IT departments will learn how to use consultants and vendors to get the most bang for their technology bucks The care and maintenance of technology is a specialized field requiring a diverse set of skills to perform properly Many libraries find it difficult to attract skilled people because of a lack of personnel budgets because of a location that is rural enough to have a limited applicant pool or because the library lacks enough technological savvy to make effective hiring decisions Regardless of the reason for the lack of technological skill in a library s staff there are ways to outsource major technological functions of the library so that even very small libraries can have the same access to technology as the big libraries and big libraries can manage huge technological projects with the same resources and skills as multinational companies Outsourcing Technology A Practical Guide for Librarians will provide the information and guidance needed for both the smallest libraries to embrace technology and the largest libraries to get the most from their technology investments with tips and tricks for libraries of size between as well Checklists and forms make this both a great source of information as well as a hands on tool

Determinants of Information Technology Outsourcing Lawrence Loh,2016-10-26 Excerpt from Determinants of Information Technology Outsourcing A Cross Sectional Analysis It is a truism that information technology it has transcended its established administrative support function and has moved toward playing a more central role of business operations see for instance 14 18 25 Within this tradition research efforts have focused on the use of IT to in uence the boundaries of a firm with its suppliers buyers and other intermediaries 6 8 There is however a glaring lack of research emphasis on the role of IT infrastructure as a component of the firm boundary itself In other words while IT has been considered a critical mechanism of multi organizational business relationships the research stream has treated the governance of IT infrastructure to be within one single firm s hierarchy Such an approach fails to recognize the recent trend towards managing a firm s IT infrastructure through a variety of governance mechanisms with other firms About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
