Telephone Health Assessment Guidelines For Practice:

Telephone Health Assessment Sandra M. Simonsen, 2001 Thoroughly revised and updated this resource helps nurses and other health care providers accurately assess a patient's health problem over the telephone. It provides concise yet comprehensive interview questions as well as triage guidelines for the nurse to follow based on the caller's responses. Each topic is fully covered on a two-page spread with information readily available at a glance. Includes a documentation tablet for adult and pediatric patients.

Application Of Nursing Process and Nursing Diagnosis Marilyn E. Doenges, Mary Frances Moorhouse, 2012-12-07 When you understand the whys of each step of the nursing process, it's easier to understand how to apply them in the real world in which you will practice. Take an interactive step-by-step approach to developing the diagnostic reasoning and problem-solving skills you need to think like a nurse with the resources you'll find in this unique workbook-style text.

Foundations of Nursing Barbara Lauritsen Christensen, Elaine Oden Kockrow, 2003 An ideal companion text to *Adult Health Nursing*, this clearly written, colorful, and attractively designed resource has all the fundamentals and skills: maternal and neonatal, pediatric, geriatric, mental health, community, and leadership content needed to educate LPN/LVNs. Used together, these two texts provide all the content covered in the entire LPN/LVN curriculum. Skills for a wide range of nursing care are presented in a straightforward step-by-step format with nursing actions and rationales clearly defined. Clinical Pathways are discussed and explained. Nursing Care Plans include critical thinking questions and are developed around specific case studies with an emphasis on patient goals and outcomes. The nursing process is applied consistently and logically to the discussion of disorders and appears in complete summary form at the end of applicable chapters. Nursing Diagnoses paired with disorder-appropriate Nursing Interventions are screened and highlighted. Therapeutic Dialogue boxes focus on communication through real-life examples of nurse-patient dialogue. Patient Teaching boxes examine discharge instructions and health promotion for patients and families. Home Health Considerations boxes discuss issues facing patients and caregivers in the home care setting. Older Adult Considerations boxes bring a gerontologic perspective to the analysis of specific disorders. Cultural and Ethnic Considerations boxes teach students about specific cultural preferences and how to address the needs of cultural diversity when planning nursing care. Medications tables provide quick access to action, dosage, precautions, and nursing considerations for commonly used drugs.

Wong's Nursing Care of Infants and Children Donna L. Wong, Marilyn J. Hockenberry, David Wilson, 2003 Painstakingly accurate, up-to-date, and highly readable. There's no question why this respected resource is pediatric nursing's foremost text. This new seventh edition maintains the high standards established by previous editions and broadens the focus in the areas of community care and evidence-based practice. Readers will find it highly appealing with superior illustrations and a beautiful full-color design throughout.
