Theory and Applications of Satisfiability Testing - SAT 2020 Luca Pulina, Martina Seidl, 2020-07-01 This book constitutes the proceedings of the 23rd International Conference on Theory and Applications of Satisfiability Testing SAT 2020 which was planned to take place in Alghero Italy during July 5-9 2020. Due to the coronavirus COVID-19 pandemic the conference was held virtually. The 25 full, 9 short and 2 tool papers presented in this volume were carefully reviewed and selected from 69 submissions. They deal with SAT interpreted in a broad sense including theoretical advances such as exact algorithms, proof complexity and other complexity issues, practical search algorithms, knowledge compilation, implementation level details of SAT solvers and SAT based systems, problem encodings and reformulations, applications including both novel application domains and improvements to existing approaches as well as case studies and reports on findings based on rigorous experimentation.
