

A New Vision for Science Education

Implications of the Vision of the Framework for K-12 Science Education and the Next Generation Science Standards

SCIENCE EDUCATION WILL INVOLVE LESS:

Rote memorization of facts and terminology

Learning of ideas disconnected from questions about phenomena

Teachers providing information to the whole class

Teachers posing questions with only one right answer

Students reading textbooks and answering questions at the end of the chapter

Pre-planned outcome for “cookbook” laboratories or hands-on activities

Worksheets

Oversimplification of activities for students who are perceived to be less able to do science and engineering

SCIENCE EDUCATION WILL INVOLVE MORE:

Facts and terminology learned as needed while developing explanations and designing solutions supported by evidence-based arguments and reasoning.

Systems thinking and modeling to explain phenomena and to give a context for the ideas to be learned

Students conducting investigations, solving problems, and engaging in discussions with teachers’ guidance

Students discussing open-ended questions that focus on the strength of the evidence used to generate claims

Students reading multiple sources, including science-related magazine and journal articles and web-based resources; students developing summaries of information.

Multiple investigations driven by students’ questions with a range of possible outcomes that collectively lead to a deep understanding of established core scientific ideas

Student writing of journals, reports, posters, and media presentations that explain and argue

Provision of supports so that all students can engage in sophisticated science and engineering practices
