Building, Materials and Civil Engineering II Jimmy Chih Ming Kao,Wen Pei Sung,Ran Chen,2012-08-24 Selected peer reviewed papers from the 2012 Second International Conference on Green Building Materials and Civil Engineering GBMCE 2012 August 22 23 2012 SanYa China [Marketing Green Buildings](#) Jerry Yudelson,2020-12-17 Engineers architects and

contractors seeking to expand their involvement in the green buildings market need a firm grounding in the marketing strategies and tactics which are being used most successfully in this specialized and growing field This book is intended to serve as an effective tool for professional green building enthusiasts and advocates in presenting green design features sustainable strategies and new products to the potential green building client The author addresses key questions such as

How is green building marketing different from other types of professional service marketing? What tools and techniques from conventional marketing can be used to greater effect in marketing green buildings? What is the size and potential of the green buildings market? And how should a firm position itself to succeed in this growing marketplace? You'll find clear descriptions of successful strategies and approaches to marketing and selling green building related services as well as up to date information on the role of LEED in green building projects.

The Complete Guide to Contracting Your Home Kent Lester, Dave McGuerty, 2017-01-12 Save 30% on home construction Whether you want to take on all the responsibility of contracting your home or simply want to intelligently communicate with your homebuilder *The Complete Guide to Contracting Your Home* can help you save 30% or more on the cost of home construction by teaching you the ins and outs of managing your construction project. Learn how to get your project off to a solid start. Get financial and legal details in language you can understand. Learn what to consider when selecting a lot and how to deal with suppliers, labor and subcontractors. Gain understanding of building codes and inspections so you can manage with authority, confidence and efficiency. This extensive guide walks you through each phase of construction including preconstruction, foundations, framing, roofing, plumbing, electrical, masonry, siding, insulation, drywall, trim, painting, cabinetry, countertops, flooring, tile and landscaping. Completely revised and updated, this edition includes a new section on sustainable building as well as the most comprehensive building resources section ever compiled. You'll find schedules, order forms, control logs, contracts and checklists to help keep your project on track.

Conference Proceedings, Green Building Challenge '98 Canada. Natural Resources Canada, 1998

The Complete Guide to Green Building & Remodeling Your Home Martha Maeda, 2011 In today's economy and socially conscious environment regarding the environment, many people cannot afford not to start considering ways they can build or remodel their home to ensure it is green. With scientific sources such as the UN Council on Global Warming making statements about the degradation of ice flow and environmental conditions by 2050 and the likelihood that crude oil sources will be used up within the next fifty years, it is especially necessary for young families to consider the implications of re-examining their homes and living situations to be more green. This book will guide you and your family through the process of learning more about and implementing the necessary changes and perspectives needed to change your home or build a new home that is environmentally conscious and prepared for the changing economic and environmental climate in the coming decades. You will learn why people have started to build green and how it can be done in today's regulatory and cost conditions quickly and inexpensively. You will learn how to remodel with green in mind and how to start working with building professionals that can provide the necessary materials, plans and paperwork you need to proceed. You will learn which materials are best for green building by lifespan and how to choose between various green materials. You will learn how to not only use green materials but to make sure the construction process is green as well. You will learn the basics of framing your building, natural building methods, the energy systems you might use and the heating

cooling options at your disposal Construction and environmental experts have been interviewed and their expertise is included in this book to help you learn everything you need to accomplish the above as well as to know what kinds of water and waste systems are best how to site plan and landscape your home and what the most common myths about green building are You will learn ten things you can do on any building project to keep it green and any materials you should always have on hand for anything you do around the house Regardless of whether you are just looking to remodel to make your house greener or are building a new home this book will give you everything you need to stay green and respect the environment with your home
