The Roman Goddess Ceres Barbetta Stanley Spaeth,1996 Interest in goddess worship is growing in contemporary society as women seek models for feminine spirituality and wholeness New cults are developing around ancient goddesses from many cultures although their modern adherents often envision and interpret the goddesses very differently than their original worshippers did In this thematic study of the Roman goddess Ceres Barbetta Spaeth explores the rich complexity of meanings and functions that grew up around the goddess from the prehistoric period to the Late Roman Empire In particular she examines two major concepts fertility and liminality and two social categories the plebs and women which were inextricably linked with Ceres in the Roman mind Spaeth then analyzes an image of the goddess in a relief of the Ara Pacis an important state monument of the Augustan period showing how it incorporates all these varied roles and associations of Ceres This interpretation

represents a new contribution to art history With its use of literary epigraphical numismatic artistic and archaeological evidence The Roman Goddess Ceres presents a more encompassing view of the goddess than was previously available It will be important reading for all students of Classics as well as for a general audience interested in New Age feminist or pagan spirituality
