Symposium Sweeteners:

Optimising Sweet Taste in Foods W J Spillane, 2006-07-17 A sweet taste is often a critical component in a consumer's sensory evaluation of a food product. This important book summarises key research on what determines consumer perceptions of sweet taste: the range of sweet tasting compounds and the ways their use in foods can be optimised. The first part of the book reviews factors affecting sweet taste perception. It includes chapters on how taste cells respond to sweet taste compounds, genetic differences in sweet taste perception, the influence of taste odour and taste ingredient interactions, and ways of measuring consumer perceptions of sweet taste. Part two discusses the main types of sweet tasting compounds: sucrose, polyols, low calorie and reduced calorie sweeteners. The final part of the book looks at ways of improving the use of sweet tasting compounds, including the range of strategies for developing new natural sweeteners, improving sweetener taste, optimising synergies in sweetener blends, and improving the use of bulk sweeteners. With its distinguished editor and international team of contributors, *Optimising sweet taste in foods* is a standard reference for the food industry in improving low fat and other foods. Investigates what determines consumer perceptions of sweet taste. Looks at improving the use of sweet tasting compounds. Explores strategies for delivering new natural sweeteners. **Drug Design** E. J. Ariëns, 2013-10-22 *Drug Design Volume VIII* covers a critical review and new extensions of quantitative methods in drug design: the design of particular types of agents such as synthetic sweeteners and selective ion binding compounds. The book discusses the advances in the methodology of quantitative drug design, the application of pattern recognition to drug design, and the design of controlled drug delivery systems. The text also describes the use of receptor binding as a tool in the development of new bioactive steroids, the design of synthetic sweeteners, and the prospective assessment of environmental effects of chemicals. The design of selective ion binding macrocyclic compounds and their biological applications are also encompassed. Chemists, pharmacologists, biochemists, and people involved in drug design and manufacture will find the book invaluable. *Foods and Food Production Encyclopedia* Douglas M. Considine, 2012-12-06 Bioactive Natural Products (Part E) Atta-ur Rahman, 1995-01-27 *Bioactive Natural Products Part E* **Catalog** Food and Nutrition Information Center (U.S.), 1974 **Food and Nutrition Information and Educational Materials Center catalog** Food and Nutrition Information Center (U.S.), 1976 **Sweeteners** National Academy of Sciences (U.S.), 1975 Catalog.
