*Syntax and Semantics* Ferenc Kiefer,Katalin É Kiss,1994 *Configurationality in Hungarian* Katalin E. Kiss,1987-06-30

The purpose of this book is to argue for the claim that Hungarian sentence structure consists of a non configurational propositional component preceded by configurationally determined operator positions In the course of this various descriptive issues of Hungarian syntax will be analyzed and various theoretical questions concerning the existence and nature of non configurational languages will be addressed The descriptive problems to be examined in Chapters 2 and 3 center around the word order of Hungarian sentences Chapter 2 identifies an invariant structure in the apparently freely permutable Hungarian sentence pointing out systematic correspondences between the structural position interpretation and stressing and intonation of the different constituents Chapter 3 analyzes the word order phenomenon traditionally called sentence inter twining of complex sentences and shows that the term in fact covers two different constructions a structure resulting from operator movement and a base generated pattern with differences in constituent order operator scope and V object agreement Chapter 4 deals interpretation case assignment with the coreference possibilities of reflexives reciprocals personal pro nouns and lexical NPs Finally Chapter 5 assigns structures to the two major sentence types containing an infinitive It analyzes infinitives with an AGR marker and a lexical subject focusing on the problem of case assignment to the subject as well as subject control constructions accounting for their often paradoxical simultaneously mono and biclausal behaviour in respect to word order operator scope and V object agreement *Hungarian Sentence Prosody and Universal Grammar* László Hunyadi,2002 The book presents a generative account of the relation between the prosodic and syntactic structure in Hungarian It shows that in order to account for the various scope readings of a single syntactic structure one has to consider the respective prosodic realizations suggesting a direct relation between Phonetic Form and Logical Form Universal principles of this relation are supported by data from a number of languages Contents Preliminary Thoughts on Prosody On Stress and its Manifestations Stress and Syntactic vs Semantic Categories Metrical Phonology and the Syntax of Hungarian The Outlines of a Metrical Model of Hungarian Sentence Complex Prosodic Structures and their Logical Interpretation Operator Scope and Prosody Logical Form Prosody and Universal Implications *De lingua et litteris* Danuta Stanulewicz,2005
