Julian Warner

Technology Labor:

Japan International Monetary Fund. Asia and Pacific Dept, 2018-11-28 This Selected Issues explores Japan's experiences with past value added tax (VAT) rate increases and discusses potential policy options to mitigate the economic impact of a third rate increase. It assesses the impact on the Japanese economy and where possible provides some international context. Alongside possible mitigating policies it also discusses the importance of policy commitment and credibility and how they can influence the macroeconomic impact of tax rate changes. Carefully designing policy measures and communicating them clearly to the public are paramount to attenuate any negative outcomes in the short term. A simple single rate VAT would efficiently raise tax revenues and support the government's objective of achieving fiscal consolidation in the medium term. Assuming underlying macroeconomic conditions are favorable the October 2019 VAT rate increase could potentially have a smaller impact on the economy relative to that of 2014 for several reasons. In order to reduce policy uncertainty and alleviate any adverse impacts from the 2019 VAT rate increase the authorities should clearly communicate the timing and content of associated mitigating measures.

[Networking Regionalised Innovative Labour Markets](#) Ulrich Hilpert, Helen Lawton Smith, 2013 Innovative and creative labour is increasingly recognised as having a key role in regional economic development. The more advanced the processes of innovation led entrepreneurship are the more important become highly skilled scientific engineering professional and university trained personnel. This has led to the existing concentration in Europe and the US of innovative labour in a limited number of locations as elsewhere in the world and the tendency on both continents for further concentration at these Islands.

Human Information Retrieval Julian Warner, 2009-09-25 An overview of information retrieval rooted in the humanities and social sciences but informed by an understanding of information technology and information theory. Information retrieval in the age of Internet search engines has become part of ordinary discourse and everyday practice. Google is a verb in common usage. Thus far more attention has been given to practical understanding of information retrieval than to a full theoretical account. In *Human Information Retrieval* Julian Warner offers a comprehensive overview of information retrieval synthesizing theories from different disciplines: information and computer science, librarianship and indexing and information society discourse and incorporating such disparate systems as WorldCat and Google into a single robust theoretical framework. There is a need for such a theoretical treatment he argues one that reveals the structure and underlying patterns of this complex field while remaining congruent with everyday practice. Warner presents a labor theoretic approach to information retrieval building on his previously formulated distinction between semantic and syntactic mental labor arguing that the description and search labor of information retrieval can be understood as both semantic and syntactic in character. Warner's information science approach is rooted in the humanities and the social sciences but informed by an understanding of information technology and

information theory The chapters offer a progressive exposition of the topic with illustrative examples to explain the concepts presented Neither narrowly practical nor largely speculative Human Information Retrieval meets the contemporary need for a broader treatment of information and information systems

Handbook of Economic Growth Philippe Aghion, Steven Durlauf, 2013-12-20 Volumes 2A and 2B of The Handbook of Economic Growth summarize recent advances in theoretical and empirical work while offering new perspectives on a range of growth mechanisms from the roles played by institutions and organizations to the ways factors beyond capital accumulation and technological change can affect growth Written by research leaders the chapters summarize and evaluate recent advances while explaining where further research might be profitable With analyses that are provocative and controversial because they are so directly relevant to public policy and private decision making these two volumes uphold the standard for excellence in applied economics set by Volumes 1A and 1B 2005 Offers definitive theoretical and empirical scholarship about growth economics Empowers readers to evaluate the work of other economists and to plan their own research projects Demonstrates the value of empirical testing with its implicit conclusion that our understanding of economic growth will help everyone make better decisions

Technology and Employment Richard Michael Cyert, David C. Mowery, Committee on Science, Engineering, and Public Policy (U.S.). Panel on Technology and Employment, 1987 This report addresses a number of issues that have surfaced in the debates over the impact of technological change on employment These issues include the effects of technological change on levels of employment and unemployment within the economy on the displacement of workers in specific industries or sectors of the economy on skill requirements on the welfare of women minorities and labor force entrants in a technologically transformed economy and on the organization of the firm and the workplace It concludes that technological change will contribute significantly to growth in employment opportunities and wages although workers in specific occupations and industries may have to move among jobs and careers Recommends initiatives and options to assist workers in making such transitions ISBN 0 309 03744 1 pbk
