Cardboard model making Dr. Ulrich Böhme, Cardboard model making is probably one of the first types of model making for which kits or building sheets were offered in series For the first time many people were able to build models of real or fictitious buildings and vehicles It is interesting to note that cardboard model making even though nowadays there is an almost unlimited variety of materials available for model making is experiencing a great renaissance and an active community of cardboard model makers has developed Nowadays there is almost nothing that is not available as cardboard model building sheets whether from professional publishers or from

idealistic suppliers In this book Ulrich B hme looks at cardboard modelling from two perspectives On the one hand he describes the history of this form of model making in all its facets On the other hand he gives practical tips based on examples from the most diverse areas of cardboard model making He shows how to create a simple model and how to improve it He creates entire dioramas and restores aging historical models In short In this book he takes you into the fascinating world of cardboard model making From the content Models are contemporary witnesses Paper as a working material Early cut out and model sheets Publishing houses Which scale is the right one for me Working with paper Tools Adhesives Rounding Architectural models Aircraft Land vehicles Ships Special models Self build models Building an old shipyard hall Dioramas Restoration and storage *Encyclopedia of Materials Science and Engineering* ,1986
