

Tips For Building with Green Intention!

- 1. Understanding Ecosystem Impacts** - Consider the materials you use and what they take from the Earth through their life cycle. Look for renewables and/or materials that are long-lasting and if those aren't available, look for opportunities to reuse!
- 2. Calculate the Embodied Carbon** - These are emissions which result from harvest, manufacturing and transport. Find out what the level is on the products you are considering selecting, then pick wisely.
- 3. Assessing Ongoing Needs** - It is important to not only think about the impacts of your building project, but also the ongoing maintenance and possible ongoing energy and water needs.
- 4. Join the Red List Challenge** - Avoid this list of contaminants in the materials you build with to create a safe and healthy living environment:
 - https://en.wikipedia.org/wiki/Red_List_building_materials#Living_Building_Challenge_Red_List
- 5. Energy Models** - Consider using an energy model to assess your energy needs. This will guide you towards the most efficient way to reach your goals for a new build or to identify opportunities for improvements in an existing retrofit, many online resources exist such as:

The Complete Guide to Green Building & Remodeling Your Home Martha Maeda,2011 In today s economy and socially conscious environment regarding the environment many people cannot afford not to start considering ways they can build or remodel their home to ensure it is green With scientific sources such as the UN council on global warming making statements about the degradation of ice flow and environmental conditions by 2050 and the likelihood that crude oil sources

will be used up within the next fifty years it is especially necessary for young families to consider the implications of re-examining their homes and living situations to be more green. This book will guide you and your family through the process of learning more about and implementing the necessary changes and perspectives needed to change your home or build a new home that is environmentally conscious and prepared for the changing economic and environmental climate in the coming decades. You will learn why people have started to build green and how it can be done in today's regulatory and cost conditions quickly and inexpensively. You will learn how to remodel with green in mind and how to start working with building professionals that can provide the necessary materials, plans, and paperwork you need to proceed. You will learn which materials are best for green building by lifespan and how to choose between various green materials. You will learn how to not only use green materials but to make sure the construction process is green as well. You will learn the basics of framing your building, natural building methods, the energy systems you might use, and the heating/cooling options at your disposal. Construction and environmental experts have been interviewed, and their expertise is included in this book to help you learn everything you need to accomplish the above, as well as to know what kinds of water and waste systems are best, how to site plan and landscape your home, and what the most common myths about green building are. You will learn ten things you can do on any building project to keep it green, and any materials you should always have on hand for anything you do around the house. Regardless of whether you are just looking to remodel to make your house greener or are building a new home, this book will give you everything you need to stay green and respect the environment with your home.

Sustainable Construction Guide Marion County (Or.). Public Works. Environmental Services, 2006. The Integrative Design Guide to Green Building 7group, Bill Reed, 2009-04-13. The members of 7group and Bill Reed are examples writ large of the kind of leadership that is taking this idea of green building and forming it into reality by helping change minds, building practice, and design process from the Foreword by S. Rick Fedrizzi, President, CEO, and Founding Chair, U.S. Green Building Council. A whole building approach to sustainability. The integrative design process offers a new path to making better green building decisions and addressing complex issues that threaten living systems. In The Integrative Design Guide to Green Building: Redefining the Practice of Sustainability, 7group's principals and integrative design pioneer Bill Reed introduce design and construction professionals to the concepts of whole building design and whole systems. With integrative thinking that reframes what sustainability means, they provide a how-to guide for architects, designers, engineers, developers, builders, and other professionals on incorporating integrative design into every phase of a project. This practical manual explains the philosophy and underpinnings of effective integrative design, addressing systems thinking and building and community design from a whole living system perspective. Details how to implement integrative design from the discovery phase to occupancy, supported by process outlines, itemized tasks, practice examples, case studies, and real-world stories illustrating the nature of this work. Explores the deeper understanding of integration that is required to transform architectural practice and
