Kerins,2014-12-30 **Speaking, Reading, and Writing in Children With Language Learning Disabilities** Katharine G. Butler,Elaine R. Silliman,2001-12-01 The ability to use language in more literate ways has always been a central outcome of education Today however being literate requires more than functional literacy the recognition of printed words as meaningful It requires the knowledge of how to use language as a tool for analyzing synthesizing and integrating what is heard or read in order to arrive at new interpretations Specialists in education cognitive psychology learning disabilities communication sciences and disorders and other fields have studied the language learning problems of school age children from their own perspectives All have tended to emphasize either the oral language component or phonemic awareness The major influence of phonemic awareness on learning to read and spell is well researched but it is not the only relevant focus for efforts in intervention and instruction An issue is that applications are usually the products of a single discipline or profession and few integrate an understanding of phonemic awareness with an understanding of the ways in which oral language comprehension and expression support reading writing and spelling Thus what we have learned about language remains disconnected from what we have learned about literacy interrelationships between language and literacy are not appreciated and educational services for students with language and learning disabilities are fragmented as a result This unique book a multidisciplinary collaboration bridges research practice and the development of new technologies It offers the first comprehensive and integrated overview of the multiple factors involved in language learning from late preschool through post high school that must be considered if problems are to be effectively addressed Practitioners researchers and students professionally concerned with these problems will find the book an invaluable resource Speech and Language Therapy Myra Kersner,Jannet Wright,2013-03-01 Now in its second edition *Speech and Language Therapy* the decision making process when working with children reveals how recent research and changes in health and education services have affected the decision making process in the assessment and management of children with speech and language problems With individual chapters written by experts in their field this book Illustrates how the decisions made by practitioners may vary within different work settings Shows how these decisions may need to be adapted when working with specific client groups Explores how such decisions are part of effective evidence based practice Offers an overview of the skills required by the developing professional Provides insight into working as a newly qualified therapist in the current job market Rigorously underpinned with current research and revised legislation this is an important textbook for speech and language therapy students potential students and specialist teachers in training *Speech and Language Therapy* the decision making process when working with children will also be relevant to newly qualified therapists therapists returning to the profession specialist teachers and Special Educational Needs Coordinators *Speech, Language, and Hearing Programs in Schools* Pamela O'Connell,1997 To help you better serve special needs children PRO ED

presents Speech Language and Hearing Programs in Schools A Guide for Students and Practitioners While other resources may provide the basics this book brings a comprehensive approach to improving your students communications skills Three logically organized interrelated sections Foundation Program Implementation and Contemporary Issues help readers increase their knowledge base by gaining a solid understanding of the principles and practices underpinning today s learning disability movement
