AECOM,2021-09-23 A range of factors are all combining to propel input cost inflation Higher international logistics costs returning demand from industry workload and higher global metals prices are some of the ingredients to quicker building cost inflation Whilst some EU materials exporters to the UK are adjusting to Brexit other EU exporters initially smaller or specialist firms hit proportionally harder are now deciding not to supply the UK at all because the additional red tape

involved makes it not commercially viable. If this trend replicates across the whole EU to UK supply chain, visible disruption and higher prices are likely until other sources of supply begin to increase in volume and step in to address these supply issues. Among other exporters continuing to supply the UK, significant price increases are being applied to cover the permanent Brexit non-tariff barriers and additional administrative processes.

Demand is currently holding up but project viability is coming under increasing pressure and headwinds are strengthening.
