## **Stand World Politicstext Only:**

*The Moral Standing of the State in International Politics* Milla Emilia Vaha, 2021-07-15 Kant's moral and political philosophy has been important in developing ethical thinking in international relations. This study argues that his theory of the state is crucially important for understanding the moral agency of the state as it is discussed in contemporary debates. For Kant, it is argued that the state has not only duties but also controversially inalienable rights that ground its relationship to its citizens and to other states. Most importantly, the state, regardless of its governmental form or factual behaviour, has a right to exist as a state. The Kantian account provided therefore explores not only the moral agency but also the moral standing of the state, examining the status of different kinds of states in world politics and expectations towards their ethical behaviour. Every state has a moral standing that must be respected in a morally imperfect world, gradually transforming towards the ideal condition of perpetual peace.

Classics of International Relations Henrik Bliddal, Casper Sylvest, Peter Wilson, 2013-07-24 *Classics of International Relations* introduces, contextualises and assesses 24 of the most important works on international relations of the last 100 years. Providing an indispensable guide for all students of IR theory, from advanced undergraduates to academic specialists, it asks why these works are considered classics. Is their status deserved? Will it endure? It takes as its starting point Norman Angell's best-selling *The Great Illusion* (1909) and concludes with Daniel Deudney's award-winning *Bounding Power* (2006). The volume does not ignore established classics such as Morgenthau's *Politics Among Nations* and Waltz's *Theory of International Politics*, but seeks to expand the IR canon beyond its core realist and liberal texts. It thus considers emerging classics such as Linklater's critical sociology of moral boundaries, *Men and Citizens in the Theory of International Relations*, and Enloe's pioneering gender analysis, *Bananas, Beaches and Bases*. It also innovatively considers certain alternative format classics such as Kubrick's satire on the nuclear arms race, *Dr Strangelove*, and Errol Morris's powerful documentary on war and US foreign policy, *The Fog of War*. With an international cast of contributors, many of them leading authorities on their subject, *Classics of International Relations* will become a standard reference for all those wishing to make sense of a rapidly developing and diversifying field. *Classics of International Relations* is designed to become a standard reference text for advanced undergraduates, postgraduates and lecturers in the field of IR.

*International Relations Theories* Timothy Dunne, Milja Kurki, Steve Smith, 2013-01-03 Drawing on a wealth of expertise from an international team of contributors, the second edition of *International Relations Theories* presents a diverse selection of theoretical positions. Arguing that theory is central to explaining the dynamics of world politics, editors Tim Dunne, Milja Kurki and Steve Smith cover a wide variety of theoretical positions, from the historically dominant traditions to powerful critical voices since the 1980s. The editors have brought together a team of international contributors, each specializing in a different theory. The contributors explain the theoretical background to their positions before showing how and why their theories matter. The book opens up space for analysis and debate, allowing students to decide which theories they find most useful in
