The Testing and Grading of Students Ohmer Milton, John W. Edgerly, 1976      **What We Know About Grading** Thomas R. Guskey, Susan M. Brookhart, 2019-02-04 Grading is one of the most hotly debated topics in education and grading practices themselves are largely based on tradition instinct or personal history or philosophy But to be effective grading policies and practices must be based on trustworthy research evidence Enter this book a review of 100 plus years of grading research that presents the broadest and most comprehensive summary of research on grading and reporting available to date with clear takeaways for learning and teaching Edited by Thomas R Guskey and Susan M Brookhart this indispensable guide features thoughtful thorough dives into the research from a distinguished team of scholars geared to a broad range of stakeholders including teachers school leaders policymakers and researchers Each chapter addresses a different area of grading research and describes how the major findings in that area might be leveraged to improve grading policy and practice Ultimately Guskey and Brookhart identify four themes emerging from the research that can guide these efforts Start with clear learning goals Focus on the feedback function of grades Limit the number of grade categories and Provide multiple grades that reflect product process and progress criteria By distilling the vast body of research evidence into meaningful actionable findings and strategies this book is the jump start all stakeholders need to build a better understanding of what works and where to go from here      *Tips for Improving Testing and Grading* John C. Ory, Katherine E. Ryan, 1993-08-10 The Ory Ryan volume offers practical advice for developing using and grading classroom examinations The book encourages faculty to understand the potential benefits they can reap from appropriate and careful testing and grading practices and the role of testing in promoting quality teaching it is very helpful and well structured for those faculty who rely on traditional forms of assessment This book will help such faculty improve their test development and assessment skills as well as encouraging them to reflect on their own testing and grading practices Patricia H Wheeler in *Evaluation Practice* This book provides a thorough discussion of general testing and grading issues The topics one would expect to be covered are all addressed in a thorough and step by step manner I particularly like the activities accompanying each chapter They are brief doable and inviting It would be particularly helpful for new faculty but experienced faculty might also benefit from the discussion of how to evaluate past exams and the pros and cons of various grading policies Shirley Ronkowski Office of Instructional Consultation University of California Santa Barbara Do you enjoy teaching students about your field but loathe the testing and grading process Do you find yourself using the same kinds of tests that you had as a student Aimed at helping faculty develop more effective assessment strategies Ory and Ryan s book provides practical suggestions for developing using and grading classroom exams Through the use of detailed examples check lists exercises and lucid explanations this book will help you determine what content to include on an exam assess difficulty level of items write different kinds of test items multiple choice matching true false essay and short answer prepare a professional looking exam

deal with cheating score different test items determine if various content areas were adequately taught help students review for an exam select a grading method and develop your own grading strategy If you want your exams and grades to be an accurate reflection of the material your students have mastered then this book is the resource for you

Foundation for the Advancement of Teaching, 1916 **Rethinking Grading** Cathy Vatterott, 2015-07-13 Grading systems

often reward on time task completion and penalize disorganization and bad behavior. Despite our best intentions, grades seem to reflect student compliance more than student learning and engagement. In the process, we inadvertently subvert the learning process. After careful research and years of experiences with grading as a teacher and a parent, Cathy Vatterott examines and debunks traditional practices and policies of grading in K-12 schools. She offers a new paradigm for standards-based grading that focuses on student mastery of content and gives concrete examples from elementary, middle, and high schools. *Rethinking Grading* will show all educators how standards-based grading can authentically reflect student progress and learning and significantly improve both teaching and learning. Cathy Vatterott is an education professor and researcher at the University of Missouri St. Louis, a former middle school teacher and principal, and a parent of a college graduate. She has learned from her workshops that grading continues to be the most contentious part, conjuring up the most intense emotions and heated disagreements. Vatterott is also the author of the book *Rethinking Homework: Best Practices That Support Diverse Needs*.

*Charting a Course to Standards-Based Grading* Tim R. Westerberg, 2016-08-24. What is the best way to ensure that grading policies are fair, accurate, and consistent across classrooms? How can schools transition to a grading system that better reflects what students are actually learning? Tim R. Westerberg makes this journey easier by offering a continuum of options with four destinations on the road to improved grading and assessment. Destination 1 critically examines such popular grading mechanisms as the zero extra credit, the semester killer project, averaging, mixing academic performance with work ethic, and refusing to accept late work, and explains how they undermine objectivity and instead result in widely divergent grades for comparable work with major consequences for students. Destination 2 invites educators to put assessment and grading into the larger context of a districtwide, guaranteed, and viable curriculum and lays out the organizational conditions and necessary steps to accomplish this goal. Destination 3 brings parents and others on board with a multiyear implementation plan and community engagement strategies for introducing report cards that indicate student achievement by standards rather than, or in addition to, letter grades. Destination 4, competency-based education, involves a total rethinking of the nature and structure of school, leading to individualized education for all students. However far they choose to go, administrators and teacher leaders can turn to *Charting a Course to Standards-Based Grading* for the quick wins and long-term support and guidance they need to make the trip well worth the effort.
