Texas Medicaid In Perspective:

Texas Medicaid in Perspective Anne Dunkelberg,1994 A comprehensive report on the Medicaid situation in the State of Texas Includes Medicaid fundamentals the big picture what does Medicaid do Medicaid spending from all angles the Texas context father to go new directions for Medicaid an extensive glossary 40 charts tables [Texas Medicaid in Perspective](#) Brooke Burnside,Nora Cox Taylor,Texas Health and Human Services Commission,2002 **Texas Medicaid and CHIP in Perspective** ,2009 *Texas Medicaid Reform Model* John Davidson,Vance Ginn,2015 We find that the Texas Medicaid Reform Model would provide substantial cost savings through a federal block grant that allows Texas to shift some risk groups into a defined contribution program that subsidizes private health insurance premiums and includes an incentive to choose a high deductible plan with a health savings account This model would ask Texans to have some skin in the game providing an incentive to deter overuse of healthcare while providing quality cost effective health care and superior access to providers compared to the status quo Our results show that the annual cost savings to the Medicaid program under the reform model will be in the 6 billion range after ten years The Texas Medicaid Reform Model provides an approach that would satisfy these concerns and improve the well being of all Texans It could also help other states seeking to adopt a similar approach although further modeling would be required to estimate cost savings in states that adopt such reforms [Environmental Health Perspectives](#) ,1993 **The Texas Economy** Louis J. Haag,Rex C. Peebles,Gary Keith,1997 The unique coverage of topics is supported by discussions that capture students interest and provide them with the conceptual tools that they need to enrich their understanding of politics and government in Texas In addition because of the authors involvement in Texas state and local politics their text provides an insider s view *In the Middle* Cade Spaulding,2011 In this study I investigate how healthcare workers involved in the Texas Medicaid

program as healthcare providers cope with four workplace constraints Healthcare workers are constrained by 1 the policies and practices of the Medicaid program 2 their own individual and professional values towards indigent care 3 the rules and policies of their own organization and business type and 4 the Medicaid patients with whom they interact I use structuration theory and sensemaking to better understand how these professionals cope with these challenging constraints Using in depth interviews of 36 private and public healthcare professionals from four unique fields of service i e dental optical pediatric mental health I applied a modified grounded theory approach to understand 1 how professionals make sense of the four Medicaid constraints described above 2 how sensemaking strategies help or hinder professional performance and 3 how sensemaking communication shapes professional identity and work perceptions Healthcare workers viewed Medicaid support staff as flippant rude incompetent unhelpful and unreliable However providers believed Medicaid was equal to or better than other insurance companies for speed and reliability of payment While they unanimously identified with providing indigent healthcare they also clashed with the Medicaid program as a vehicle for those services Private practices framed Medicaid as a liability while public non profit organizations relied on Medicaid as a primary source of revenue Providers agreed that Medicaid patients had poor follow through a high no show rate were undisciplined and crowded provider offices with unscheduled family members Healthcare workers enacted self reliance as individuals by networking with other Medicaid providers and by relying on in house experts They also engaged in discursive strategies by minimizing blaming and detaching They viewed themselves as disciplinarians problem solvers advocates and benefactors Theoretically this study develops the concept of identity regions and reframes workplace constraints as necessary identity structures It also suggests that how Medicaid patients behave may have a more damaging impact on whether providers are willing to work with Medicaid than low reimbursement rates
