

Text Entry for Mobile Computing: Models and Methods, Theory and Practice

I. Scott MacKenzie and R. William Soukoreff
York University

ABSTRACT

Text input for mobile or handheld devices is a flourishing research area. This article begins with a brief history of the emergence and impact of mobile computers and mobile communications devices. Key factors in conducting sound evaluations of new technologies for mobile text entry are presented, including methodology and experiment design. Important factors to consider are identified and elaborated, such as focus of attention, text creation versus text copy tasks, novice versus expert performance, quantitative versus qualitative measures, and the speed–accuracy trade-off. An exciting area within mobile text entry is the combined use of Fitts’ law and a language corpus to model, and subsequently optimize, a text entry technique. The model is described, along with examples for a variety of soft keyboards as well as the telephone keypad. A survey of mobile text entry techniques, both in research papers and in commercial products, is presented.

I. Scott MacKenzie is a computer scientist with an interest in human–computer interaction, especially human input to computing systems and human performance measurement and modeling; he is an Associate Professor in the Department of Computer Science at York University. **R. William Soukoreff** is a computer scientist with an interest in human–computer interaction; he is a graduate student in the Department of Computer Science at York University.

Text Entry For Mobile Computing:

Text Entry for Mobile Computing I. Scott MacKenzie, 2003-07-30 The four articles in this special issue of Human Computer Interaction describe recent research in mobile text entry The issue begins with a review article that provides general comments on methodologies for evaluating new text entry techniques The next two articles present Dasher a text entry technique with an interface driven from continuous two dimensional gestures and a detailed extension to the prediction model of Soukoreff and MacKenzie The final article takes a completely different approach to modeling the text entry task As a collection the articles represent a sample of promising research initiatives in text entry for mobile computing

Text Entry for Mobile Computing I. Scott MacKenzie, 2002-11-01 The four articles in this special issue of Human Computer Interaction describe recent research in mobile text entry The issue begins with a review article that provides general comments on methodologies for evaluating new text entry techniques The next two articles present Dasher a text entry technique with an interface driven from continuous two dimensional gestures and a detailed extension to the prediction model of Soukoreff and MacKenzie The final article takes a completely different approach to modeling the text entry task As a collection the articles represent a sample of promising research initiatives in text entry for mobile computing

Text Entry Systems I. Scott MacKenzie, Kumiko Tanaka-Ishii, 2010-07-28 Text Entry Systems covers different aspects of text entry systems and offers prospective researchers and developers global guidelines for conducting research on text entry in terms of design strategy evaluation methodology and requirements a discussion of the history and current state of the art of entry systems and specific guidelines for designing entry systems for a specific target depending on devices modalities language and different physical conditions of users Text entry has never been so important as it is today This is in large part due to the phenomenal relatively recent success of mobile computing text messaging on mobile phones and the proliferation of small devices like the Blackberry and Palm Pilot Compared with the recent past when text entry was primarily through the standard qwerty keyboard people today use a diverse array of devices with the number and variety of such devices ever increasing The variety is not just in the devices but also in the technologies used entry modalities have become more varied and include speech recognition and synthesis handwriting recognition and even eye tracking using image processing on web cams Statistical language modeling has advanced greatly in the past ten years and so therein is potential to facilitate and improve text entry increasingly the way people communicate This book covers different aspects of text entry systems and offers prospective researchers and developers Global guidelines for conducting research on text entry in terms of design strategy evaluation methodology and requirements History and current state of the art of entry systems including coverage of recent research topics Specific guidelines for designing entry systems for a specific target depending on devices modalities language and different physical conditions of users

Mobile Computing, Applications, and Services Gerard Memmi, Ulf Blanke, 2014-03-04 This book constitutes the thoroughly refereed post conference proceedings of the 5th

International Conference on Mobile Computing Applications and Services MobiCASE 2013 held in Paris France in November 2013 The 13 full 5 short and 9 poster papers were carefully reviewed and selected from 64 submissions and are presented together with 3 papers from the Workshop on Near Field Communication for Mobile Applications NFS The conference papers are covering mobile applications development mobile social networking novel user experience and interfaces mobile services and platforms such as Android iOS BlackBerry OS Windows phone Bada mobile software engineering and mobile Web mobile payments and M2M infrastructure mobile services such as novel hardware add ons energy aware services or tools NFC based services authentication services

Encyclopedia of Mobile Computing and Commerce Taniar, David,2007-04-30 The Encyclopedia of Mobile Computing and Commerce presents current trends in mobile computing and their commercial applications Hundreds of internationally renowned scholars and practitioners have written comprehensive articles exploring such topics as location and context awareness mobile networks mobile services the socio impact of mobile technology and mobile software engineering

Handbook of Research on User Interface Design and Evaluation for Mobile Technology Lumsden, Joanna,2008-02-28 This book compiles authoritative research from scholars worldwide covering the issues surrounding the influx of information technology to the office environment from choice and effective use of technologies to necessary participants in the virtual workplace Provided by publisher

The Universal Access Handbook Constantine Stephanidis,2009-06-11 In recent years the field of Universal Access has made significant progress in consolidating theoretical approaches scientific methods and technologies as well as in exploring new application domains Increasingly professionals in this rapidly maturing area require a comprehensive and multidisciplinary resource that addresses current principles

Human-Computer Interaction Julie Jacko,Constantine Stephanidis,2003-09-01 This is the second volume in the HCI International Conference Proceedings 2003 See following arrangement for details

Universal Access in Human-Computer Interaction. Context Diversity Constantine Stephanidis,2011-06-27 The four volume set LNCS 6765 6768 constitutes the refereed proceedings of the 6th International Conference on Universal Access in Human Computer Interaction UAHCI 2011 held as Part of HCI International 2011 in Orlando FL USA in July 2011 jointly with 10 other conferences addressing the latest research and development efforts and highlighting the human aspects of design and use of computing systems The 47 revised papers included in the third volume were carefully reviewed and selected from numerous submissions The papers are organized in the following topical sections universal access in the mobile context ambient assisted living and smart environments driving and interaction interactive technologies in the physical and built environment

Human-Computer Interaction -- INTERACT 2013 Paula Kotzé,Gary Marsden,Gitte Lindgaard,Janet Wesson,Marco Winckler,2013-07-30 The four volume set LNCS 8117 8120 constitutes the refereed proceedings of the 14th IFIP TC13 International Conference on Human Computer Interaction INTERACT 2013 held in Cape Town South Africa in September 2013 The 57 papers included in the first volume are organized in topical sections on 3D navigation 3D technologies 3D object

manipulation augmented reality cognitive workload cognitive workload and decision support creating effective 3D displays cross cultural intercultural and social issues data entry mechanisms and devices design and evaluation design and evaluation of prototypes design to support creativity designing for inclusiveness designing with and for people with special needs display manipulations and diversity ICT in social development

Computers Helping People with Special Needs Klaus Miesenberger, Joachim Klaus, Wolfgang Zagler, Arthur Karshmer, 2008-07-14 Welcome to the proceedings of ICCHP 2008 We were proud to welcome participants from more than 40 countries from all continents to ICCHP The International Programme Committee encompassing 102 experts from all over the world selected 150 full and 40 short papers out of 360 abstracts submitted to ICCHP Our acceptance rate of about half of the submissions demonstrates the scientific quality of the programme and in particular the proceedings you have in your hands An impressive group of experts agreed to organize Special Thematic Sessions STS for ICCHP 2008 The existence of these STS sessions helped to bring the meeting into sharper focus in several key areas of assistive technology In turn this deeper level of focus helped to bring together the state of the art and mainstream technical social cultural and political developments Our keynote speaker Jim Fruchterman from BeneTech USA highlighted the importance of giving access to ICT and AT at a global level In another keynote by Harold Thimbleby Swansea University UK the role of user centred design and usability engineering in assistive technology and accessibility was addressed And finally a combination keynote and panel discussion was reserved for WAI WCAG2.0 which we expect to be the new reference point for Web accessibility from the summer of 2008 and beyond

Mobile Computing, 2009 This multiple volume publication advances the emergent field of mobile computing offering research on approaches observations and models pertaining to mobile devices and wireless communications from over 400 leading researchers Provided by publisher

Library & Information Science Abstracts, 2007 *Multiple User Interfaces* Ahmed Seffah, Homa Javahery, 2004-01-16 Publisher Description

ACM Transactions on Computer-human Interaction, 2006 Presents original research that spans the field of human computer interaction The primary emphasis has been on results of broad application but the journal also publishes work focused on special domains on special requirements on ethical issues the full range of design development and use of interactive systems

Fourth IEEE Workshop on Mobile Computing Systems and Applications, 2002 Representing the proceedings of the June 2002 conference in Callicoon New York this slender volume contains fourteen papers on location and security implementing mobility aggregation and routing data and its context and adaptation An abstract is provided for each and b/w illustrations support most of the papers Contributors include American and a few British researchers in academia and industry Only authors are listed in the index Annotation copyrighted by Book News Inc Portland OR

Text Entry Interfaces on Mobile Devices Hamed Sad, 2009 This thesis focuses on one of the currently active areas of Human Computer Interaction HCI text entry on mobile devices Specifically it deals with the evaluation of text entry method interfaces on mobile devices We address the two main approaches of the evaluation empirical

user testing and model based evaluation A platform is presented for empirical user tests The platform aims to shorten the evaluation time and make the evaluation more reproducible and generalizable It s implemented on mobile device and equipped with many existing entry methods It also facilitates the implementation of a new idea for text entry New ideas can be tested by comparison to the already implemented methods The platform also includes valuable tools for the evaluation One tool is provided to help in the creation of a set of test phrases that represent a given language Another tool is for automating the most common analysis in text entry tests We presented a framework to identify classify and model the different operation in the text entry process on mobile devices It divides the process to two stages action planning stage and execution stage The action planning stage studies how the word or the text to be typed is mapped to the physical actions allowed by the entry system used The execution stage concerns the primitive tasks the user should done to produce text Some measures are proposed for the evaluation of the two stages The framework also identifies the different entities that should be taken into account during the evaluation Model based evaluation requires human performance models for the primitive tasks used in the entry process We studied three tasks frequently used in the execution stage of the entry process word disambiguation word selection from a list and tilt based interaction We present an algorithm and design guidelines for the design of efficient ambiguous keyboard layout A model for the selection of a word from a word list is constructed from an experimental study Another model for pointing and scrolling using tilt sensor on a mobile device is also presented Finally we present new design directions for the action planning stage that we think more interesting when compared to current designs They are based on knowledge we already have about our life and about the text we write They use this knowledge to allow typing a word in a more direct way compared to typing it letter by letter as it s the case in the current designs We provide two implementations to help the concretization of the concepts presented in that part of Page 6 Abstract Text entry interfaces on mobile devices Modeling design and evaluation PhD thesis 2009 the thesis The first shows how our knowledge can be used to type frequent words through using pictographs The second exploits language syntax to enable the user to type fast and to protect her him from committing typing errors The two implementations employ a specially constructed text prediction engine It implements language redundancy in storage efficient data structures It introduces the concept of meaning concept object action relation etc and separates it from its lexical representation in a given language [Graphics Interface 2014](#) Paul G. Kry,Andrea Bunt,2014-05-06 This book is the proceedings of the 40th annual Graphics Interface conference the oldest continuously scheduled conference in the field The book includes high quality papers on recent advances in interactive systems human computer interaction and graphics from around the world It covers the following topics shading and rendering geometric modeling and meshing image based rendering image synthesis and realism computer animation real time rendering non photorealistic rendering interaction techniques human interface devices augmented reality data and information visualization mobile computing haptic and tangible interfaces and perception *UIST* ,2000

Decoding **Text Entry For Mobile Computing**: Revealing the Captivating Potential of Verbal Expression

In a period characterized by interconnectedness and an insatiable thirst for knowledge, the captivating potential of verbal expression has emerged as a formidable force. Its power to evoke sentiments, stimulate introspection, and incite profound transformations is genuinely awe-inspiring. Within the pages of "**Text Entry For Mobile Computing**," a mesmerizing literary creation penned with a celebrated wordsmith, readers embark on an enlightening odyssey, unraveling the intricate significance of language and its enduring effect on our lives. In this appraisal, we shall explore the book's central themes, evaluate its distinctive writing style, and gauge its pervasive influence on the hearts and minds of its readership.

Text Entry For Mobile Computing Introduction

In today's digital age, the availability of Text Entry For Mobile Computing books and manuals for download has revolutionized the way we access information. Gone are the days of physically flipping through pages and carrying heavy textbooks or manuals. With just a few clicks, we can now access a wealth of knowledge from the comfort of our own homes or on the go. This article will explore the advantages of Text Entry For Mobile Computing books and manuals for download, along with some popular platforms that offer these resources. One of the significant advantages of Text Entry For Mobile Computing books and manuals for download is the cost-saving aspect. Traditional books and manuals can be costly, especially if you need to purchase several of them for educational or professional purposes. By accessing Text Entry For Mobile Computing versions, you eliminate the need to spend money on physical copies. This not only saves you money but also reduces the environmental impact associated with book production and transportation. Furthermore, Text Entry For Mobile Computing books and manuals for download are incredibly convenient. With just a computer or smartphone and an internet connection, you can access a vast library of resources on any subject imaginable. Whether you're a student looking for textbooks, a professional seeking industry-specific manuals, or someone interested in self-improvement, these digital resources provide an efficient and accessible means of acquiring knowledge. Moreover, PDF books and manuals offer a range of benefits compared to other digital formats. PDF files are designed to retain their formatting regardless of the device used to open them. This ensures that the content appears exactly as intended by the author, with no loss of formatting or missing graphics. Additionally, PDF files can be easily annotated, bookmarked, and searched for specific terms, making them highly practical for studying or referencing. When it comes to accessing Text Entry For Mobile Computing books and manuals, several platforms offer an extensive collection of resources. One such platform is Project Gutenberg, a nonprofit organization that provides over 60,000 free eBooks. These books are primarily in the public domain, meaning they can be freely distributed and downloaded. Project Gutenberg offers a wide range of classic literature, making it an excellent resource for literature enthusiasts. Another popular platform for Text Entry For Mobile Computing books and manuals is Open Library. Open Library is an initiative of the Internet Archive, a non-profit organization dedicated to digitizing cultural artifacts and making them accessible to the public. Open Library hosts millions of books, including both public domain works and contemporary

titles. It also allows users to borrow digital copies of certain books for a limited period, similar to a library lending system. Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals. These libraries often offer academic texts, research papers, and technical manuals, making them invaluable resources for students and researchers. Some notable examples include MIT OpenCourseWare, which offers free access to course materials from the Massachusetts Institute of Technology, and the Digital Public Library of America, which provides a vast collection of digitized books and historical documents. In conclusion, Text Entry For Mobile Computing books and manuals for download have transformed the way we access information. They provide a cost-effective and convenient means of acquiring knowledge, offering the ability to access a vast library of resources at our fingertips. With platforms like Project Gutenberg, Open Library, and various digital libraries offered by educational institutions, we have access to an ever-expanding collection of books and manuals. Whether for educational, professional, or personal purposes, these digital resources serve as valuable tools for continuous learning and self-improvement. So why not take advantage of the vast world of Text Entry For Mobile Computing books and manuals for download and embark on your journey of knowledge?

FAQs About Text Entry For Mobile Computing Books

How do I know which eBook platform is the best for me? Finding the best eBook platform depends on your reading preferences and device compatibility. Research different platforms, read user reviews, and explore their features before making a choice. Are free eBooks of good quality? Yes, many reputable platforms offer high-quality free eBooks, including classics and public domain works. However, make sure to verify the source to ensure the eBook credibility. Can I read eBooks without an eReader? Absolutely! Most eBook platforms offer web-based readers or mobile apps that allow you to read eBooks on your computer, tablet, or smartphone. How do I avoid digital eye strain while reading eBooks? To prevent digital eye strain, take regular breaks, adjust the font size and background color, and ensure proper lighting while reading eBooks. What the advantage of interactive eBooks? Interactive eBooks incorporate multimedia elements, quizzes, and activities, enhancing the reader engagement and providing a more immersive learning experience. Text Entry For Mobile Computing is one of the best book in our library for free trial. We provide copy of Text Entry For Mobile Computing in digital format, so the resources that you find are reliable. There are also many Ebooks of related with Text Entry For Mobile Computing. Where to download Text Entry For Mobile Computing online for free? Are you looking for Text Entry For Mobile Computing PDF? This is definitely going to save you time and cash in something you should think about.
