To Be An Astronaut:

Prepare for Launch Erik Seedhouse, 2018-10-10 Today's astronauts require many different abilities. They must not only be expert in performing flight simulations but must also be proficient in such dissimilar subjects as photography, thermodynamics, electrical repairs, flight procedures, oceanography, public affairs, and geology. In Prepare for Launch, the author introduces the technologies and myriad activities that constitute or affect astronaut training, such as the part-task trainers, emergency procedures, the fixed-based and motion-based simulators, virtual environment training, and the demands of training in the Weightless Environment Training Facility. With plans to return to the Moon and future missions to Mars, the current selection criteria and training are very different from those used for short-duration mission Space Shuttle crews. Dr. Erik Seedhouse in this book focuses on how astronaut candidates are taught to cope with different needs and environments, for example, hibernation, artificial gravity, and bioethics issues, and also includes brief discussions of the astronaut application and selection process.

An Astronaut's Guide to Life on Earth Chris Hadfield, 2013-10-29 Travel to space and back with astronaut Chris Hadfield's enthralling bestseller as your eye-opening guide. Colonel Chris Hadfield has spent decades training as an astronaut and has logged nearly 4000 hours in space. During this time, he has broken into a Space Station with a Swiss army knife, disposed of a live snake while piloting a plane, and been temporarily blinded while clinging to the exterior of an orbiting spacecraft. The secret to Col. Hadfield's success and survival is an unconventional philosophy he learned at NASA: prepare for the worst and enjoy every moment of it. In An Astronaut's Guide to Life on Earth, Col. Hadfield takes readers deep into his years of training and space exploration to show how to make the impossible possible. Through eye-opening, entertaining stories filled with the adrenaline of launch, the mesmerizing wonder of spacewalks, and the measured, calm responses mandated by crises, he explains how conventional wisdom can get in the way of achievement and happiness. His own extraordinary education in space has taught him some counterintuitive lessons: don't visualize success, do care what others think, and always sweat the small stuff. You might never be able to build a robot pilot, a spacecraft, make a music video, or perform basic surgery in zero gravity like Col. Hadfield. But his vivid and refreshing insights will teach you how to think like an astronaut and will change completely the way you view life on Earth, especially your own. Hadfield proves himself to be not only a fierce explorer of the universe but also a deeply thoughtful explorer of the human condition.
