Washington State Status Report for the Common Loon Scott A. Richardson, 2000 Federal Register, 1993-06 *Make Prayers to the Raven* Richard K. Nelson, 2024-05-31 A thorough and elegant account of the mystical connection between Native Americans and the natural world Outside This admirable reflection on the natural history of the Koyukon River drainage in Alaska is founded on knowledge the author gained as a student of the Koyukon culture indigenous to that region He presents these Athapascan views of the land principally of its animals and Koyukon relationships with those creatures together with a measured account of his own experiences and doubts For someone in search of a native American expression of ecology and natural history I can think of no better place to begin than with this work Orion Nature Quarterly Far from being a romantic attempt to pass on the spiritual lore of Native Americans for a quick fix by others this is a very serious ethnographic study of some Alaskan Indians in the Northern Forest area Nelson has painstakingly regarded their views of earth sky water mammals and every creeping thing that creepeth upon the earth He does admire their love of nature and spirit Those who see the world through his eyes using their eyes will likely come away with new respect for the boreal forest and those who live with it and in it not against it The Christian Century Nelson s presentation also gives rich insights into the Koyukon subsistence cycle through the year and into the hardships of life in this northern region The book is written with both brain and heart This book represents a landmark never before has the integration of American Indians with their environment been so well spelled out Journal of Forest History

Gulf Stream Chronicles David S. Lee, 2015-08-19 Off the shore of Hatteras Island where the inner edge of the Gulf Stream flows northward over the outer continental shelf the marine life is unlike that of any other area in the Atlantic Here the powerful ocean river helps foster an extraordinarily rich diversity of life including Sargassum mats concealing strange creatures and exotic sea beans whales and sea turtles sunfish and flying fish and shearwaters and Bermuda petrels During his long career as a research scientist David S Lee made more than 300 visits to this area off the North Carolina coast documenting its extraordinary biodiversity In this collection of twenty linked essays Lee draws on his personal observations and knowledge of the North Atlantic marine environment to introduce us to the natural wonders of an offshore treasure Lee guides readers on adventures miles offshore and leagues under the sea blending personal anecdotes with richly detailed natural history local culture and seafaring lore These journeys provide entertaining and informative connections between the land and the diverse organisms that live in the Gulf Stream off the coast of North Carolina Lee also reminds us that ocean environments are fragile and vulnerable to threats such as pollution offshore energy development and
